### MUELLER INDUSTRIES, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

### General

Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. Results of operations for the interim periods presented are not necessarily indicative of results which may be expected for any other interim period or for the year as a whole. This Quarterly Report on Form 10–Q should be read in conjunction with the Company's Annual Report on Form 10–K, including the annual financial statements incorporated therein.

The accompanying unaudited interim financial statements include all normal recurring adjustments which are, in the opinion of management, necessary to a fair statement of the results for the interim periods presented.

#### Note 1 - Earnings per Common Share

Basic per share amounts have been computed based on the average number of common shares outstanding. Diluted per share amounts reflect the increase in average common shares outstanding that would result from the assumed exercise of outstanding stock options and vesting of restricted stock grants, computed using the treasury stock method. Approximately 1.3 million stock options were excluded from the computation of diluted earnings per share for the quarter and nine-month periods ended September 26, 2009, since the options' exercise price was higher than the average market price of the Company's stock.

### Note 2 - Commitments and Contingencies

The Company is involved in certain litigation as a result of claims that arose in the ordinary course of business, which management believes will not have a material adverse effect on the Company's financial position or results of operations. During the first nine months of 2009, the Company recorded a provision of \$2.4 million, or 4 cents per diluted share after tax, as a result of additional loss contingencies that management deemed to become probable and estimable during the period. The Company may also realize the benefit of certain legal claims and litigation in the future; these gain contingencies are not recognized in the Condensed Consolidated Financial Statements.

### **Environmental Matters**

#### Southeast Kansas Sites

By letter dated October 10, 2006, the Kansas Department of Health and Environment (KDHE) advised the Company that environmental contamination has been identified at a former smelter site in southeast Kansas. KDHE asserts that the Company is a corporate successor to an entity that is alleged to have owned and operated the smelter from 1915 to 1918. The Company has since been advised of possible connection between that same entity and two other former smelter sites in Kansas. KDHE has requested that the Company and another potentially responsible party (PRP) negotiate a consent order with KDHE to address contamination at these sites. The Company has participated in preliminary discussions with KDHE and the other PRP. The Company believes it is not liable for the contamination but as an alternative to litigation, the Company has entered into settlement negotiations with the other PRP. The negotiations are ongoing.

### Shasta Area Mine Sites

Mining Remedial Recovery Company (MRRC), a wholly owned subsidiary of the Company, owns certain inactive mines in Shasta County, California. MRRC has continued a program, begun in the late 1980's, of sealing mine portals with concrete plugs in mine adits which were discharging water. The sealing program has achieved significant reductions in the metal load in discharges from these adits; however, additional reductions are required pursuant to a series of orders issued by the California Regional Water Quality Control Board (QCB). The remedial activities performed by MRRC have reduced impacts of acid rock drainage; however full compliance has not been achieved. The QCB is presently renewing MRRC's discharge permit and will concurrently issue a new order.

#### U.S.S. Lead

U.S.S. Lead Refinery, Inc., (Lead Refinery), a wholly owned subsidiary of MRRC, has been conducting remedial actions pursuant to a Consent Order with the U.S. Environmental Protection Agency (EPA) pursuant to Section 3008(h) of the Resource Conservation and Recovery Act. The Consent Order requires corrective action at Lead Refinery's East Chicago, Indiana site and provides for Lead Refinery to complete certain on-site interim remedial activities and studies that extend off-site. Site activities, which began in December 1996, have been substantially concluded. Lead Refinery's ongoing monitoring and maintenance activities at this site are handled pursuant to a post-closure permit issued by the Indiana Department of Environmental Management (IDEM) effective as of January 22, 2008. EPA has informed Lead Refinery that the Consent Order would be terminated upon issuance of the IDEM post-closure permit in effect. On April 9, 2009, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), the EPA added the Lead Refinery site to the National Priorities List (NPL). The NPL is a list of priority sites where EPA has determined that there has been a release or threatened release of contaminants that warrant investigation and, if appropriate, remedial action. The NPL does not assign liability to any party or to the owner of a property placed on the NPL. The placement of a site on the NPL does not necessarily mean that remedial action must be taken. The Company is unable to determine the likelihood of a material adverse outcome or the amount or range of a potential loss with respect to placement of this site on the NPL. Lead Refinery lacks the financial resources needed to undertake any investigations or remedial action that may be required by EPA pursuant to CERCLA.

### Eureka Mills Site

In November 2008, the Company received a general notice of liability and second request for information under CERCLA from the EPA concerning the Eureka Mills Superfund Site (the Eureka Mills Site) located in Juab County, Utah. The Eureka Mills Site is an area where mining and milling of various metals occurred over the course of several decades. The EPA has been investigating and remediating contamination associated with these activities. The Company's predecessor, Sharon Steel Corporation, acquired land within the Eureka Mills Site from UV Industries, Inc. in 1979. Pursuant to the court-approved 1990 bankruptcy plan of reorganization for Sharon Steel Corporation, the land was transferred by the Company to Amwest Exploration Company, a wholly owned subsidiary of the Company, which later sold the land to a third party in 1993. In 2001, the Company responded to an earlier request for information concerning milling activities stating that it was not responsible for any such activities at the Eureka Mills Site. The second request for information concerned historic mining activities. In responding to EPA's November 2008 letter and also to a recent third request for information received in Warch 2009, the Company stated that it does not believe it is liable for the contamination. The Company has agreed to suspend temporarily the running of the time period during which the EPA must bring a lawsuit in order to allow time for the Company and the EPA to discuss this matter. The Company is continuing to evaluate this matter.

#### United States Department of Commerce Antidumping Review

On December 24, 2008, the United States Department of Commerce (DOC) initiated an antidumping administrative review of the antidumping duty order covering circular welded non-alloy steel pipe and tube from Mexico. The review will determine the final antidumping duties owed, if any, on U.S. imports by certain subsidiaries of the Company during the period November 1, 2007 through October 31, 2008, pursuant to the existing antidumping duty order. DOC has selected Mueller Comercial de Mexico, S. de R.L. de C.V. (Mueller Comercial) as a respondent in this proceeding. On May 29, 2009, Mueller Comercial notified DOC that it would no longer participate in the review. The Company anticipates that certain of its subsidiaries will incur additional antidumping duties on subject imports made during the review period. The Company does not anticipate any material adverse effect on its financial position as a result of this review, and believes it has adequately provided for such exposure.

#### **Copper Tube Antitrust Litigation**

The Company is named as a defendant in several pending litigations (the Copper Tube Actions) brought by direct and indirect purchasers of various forms of copper tube. The Copper Tube Actions allege anticompetitive activities with respect to the sale of copper plumbing tubes and/or copper tubes used in, among other things, the manufacturing of air-conditioning and refrigeration units. All of the Copper Tube Actions seek monetary and other relief. The Company believes that the claims for relief in the Copper Tube Actions are without merit. Due to the procedural stage of the Copper Tube Actions, the Company is unable to determine the likelihood of a material adverse outcome in the Copper Tube Actions or the amount or range of a potential loss in the Copper Tube Actions.

#### **Employment Litigation**

On June 1, 2007, the Company filed a lawsuit in the Circuit Court of Dupage County, Illinois against Peter D. Berkman and Jeffrey A. Berkman, former executives of the Company and B&K Industries, Inc. (B&K), a wholly owned subsidiary of the Company, relating to their alleged breach of fiduciary duties and contractual obligations to the Company through, among other things, their involvement with a supplier of B&K during their employment with B&K. The lawsuit alleges appropriation of corporate opportunities for personal benefit, failure to disclose competitive interests or other conflicts of interest, and unfair competition, as well as breach of employment agreements in connection with the foregoing. The lawsuit seeks compensatory and punitive damages, and other appropriate relief. In August 2007, the defendants filed an answer to the complaint admitting Peter Berkman had not sought authorization to have an ownership interest in a supplier, and a counterclaim against the Company, B&K and certain of the Company's officers and directors alleging defamation, tortious interference with prospective economic relations, and conspiracy, and seeking damages in unspecified amounts. In September 2007, Homewerks Worldwide LLC, an entity formed by Peter Berkman, filed a complaint as an intervenor based on substantially the same allegations included in the Berkmans' counterclaim. In October 2007, the Company also filed a motion seeking to have the Berkmans' counterclaim dismissed as a matter of law. On January 3, 2008, the Court overruled that motion and the case proceeded to discovery of the relevant facts. Since that time, depositions and document productions have been ongoing. However, on September 5, 2008, Peter Berkman withdrew prior responses to discovery requests and asserted the Fifth Amendment privilege against self-incrimination as to all requests directed to him. By that assertion, he took the position that his testimony about his actions would have the potential of exposing him to a criminal charge or criminal charges. On October 3, 2008, in response to a motion to compel filed by the Company, the Court held that Peter Berkman could not withhold documents on Fifth Amendment grounds, amongst other things. Peter Berkman moved for reconsideration of that order and his request was denied on November 19, 2008. On December 10, 2008, Peter Berkman moved for the opportunity to file an interlocutory appeal regarding the Court's ruling on the Company's motion to compel. On January 7, 2009, the motion for interlocutory appeal was granted, the Court found Peter Berkman in contempt for resisting discovery, and Peter Berkman has since filed a notice of appeal with the Illinois Appellate Court, Second Judicial District. All appellate briefs were submitted, oral argument took place on September 29, 2009, and the Company is currently awaiting a decision regarding the issues that were appealed. On October 24, 2008, the defendants filed a motion seeking leave to interpose an Amended Answer and Amended Counterclaims. On December 19, 2008, the Company filed an answer to the Amended Counterclaims that included a new affirmative defense based on the assertion of the Fifth Amendment by Peter Berkman. The Company believes that the counterclaims are without merit and intends to defend them vigorously. The Company does not anticipate any material adverse effect on its business or financial condition as a result of this litigation.

#### Guarantees

Guarantees, in the form of letters of credit, are issued by the Company generally to guarantee the payment of insurance deductibles and certain retiree health benefits. The terms of the Company's guarantees are generally one year but are renewable annually as required. These letters are primarily backed by the Company's line of credit facility. The maximum potential amount of future payments the Company could have been required to make under its guarantees at September 26, 2009 was \$9.9 million.

#### Other

In November 2008, the Company's European copper tube operation was damaged by fire. Production was curtailed for approximately four weeks to make necessary temporary repairs. Certain production equipment and portions of building structures were extensively damaged. The total value of the loss, including business interruption, cannot be determined at this time, but is expected to be covered by property and business interruption insurance. In 2008, as a result of the fire, the Company wrote-off certain fixed assets that were damaged which was offset by a receivable. There have been no significant additional write-offs in 2009. Additionally, the Company received an advance of approximately \$5.0 million from the insurance company in 2008 and an additional \$7.3 million in the second quarter of 2009, primarily to cover cleanup costs. The Company recorded these advances in other current liabilities net of cleanup and repair costs incurred of approximately \$4.8 million, \$3.1 million of which was incurred in 2009.

In July 2009, there was an explosion at the Company's copper tube mill in Fulton, Mississippi. Production was curtailed for approximately one week for cleanup and repairs to building structures. Certain production equipment was also extensively damaged. The total value of the loss, including business interruption, cannot be determined at this time, but is expected to be covered by property and business interruption insurance. At September 26, 2009, the Company has recorded a receivable of \$0.6 million representing incremental cleanup and repair costs incurred of \$1.1 million less the insurance deductible of \$0.5 million.

The Company has not recognized potential gains arising from property damage or business interruption insurance in the Condensed Consolidated Statements of Income during 2009, and will not do so until final settlement of the insurance claims.

#### Note 3 – Inventories

(In thousands)	September 26, 2009	December 27, 2008
Raw materials and supplies	\$ 23,647	\$ 57,536
Work-in-process	33,035	39,018
Finished goods	127,525	122,756
Valuation reserves	(5,835)	(8,701)
Inventories	\$ 178,372	\$ 210,609

The Company has deferred recognizing potential gains resulting from liquidation of LIFO inventories during the first nine months of 2009. The Company expects to replenish these inventories by the end of 2009 and, as such, has not recognized the effects of liquidating LIFO layers. In the event the Company is not able to replenish these inventories due to lack of availability or operational reasons, the Company would recognize a non-cash gain of approximately \$2.8 million, before income taxes, from the liquidation of LIFO layers based on quarter-end quantities.

#### Note 4 - Goodwill

The Company recognized an estimated goodwill impairment charge of \$18.0 million in the quarter ended December 27, 2008 related to its Mexican Operations, a part of the Plumbing & Refrigeration segment. An estimate was recorded because the Company did not complete step two of its annual impairment test until the first quarter of 2009. The impairment resulted from revised projections of future cash flows as well as other estimates and assumptions due to prevailing market conditions.

The Company applies a fair value based impairment test to the net book value of goodwill and indefinite-lived intangible assets annually at the beginning of the fourth quarter and, on an interim basis if certain events or circumstances indicate that impairment may have been incurred. The analysis of potential impairment of goodwill requires a two-step process. The first step is the estimation of fair value. If this estimate indicates that impairment potentially exists, the second step is performed to quantify the amount of impairment, if any. Goodwill impairment exists when the implied fair value of goodwill is less than its carrying value.

The Company uses a discounted cash flow model (DCF model) to estimate the fair value of reporting units based on expected earnings, because there are no observable inputs available (Level 3 hierarchy as defined by Accounting Standards Codification (ASC) 820 *Fair Value Measurement & Disclosures* (ASC 820)). Cash flows are projected to equal (i) projected future earnings adjusted for the capital investment required to support operations and depreciation expense for a five-year period plus (ii) a terminal value. This cash flow stream is discounted to its present value to arrive at a fair value of each reporting unit. Future earnings are estimated using the Company's most recent annual projection, applying a growth rate to future periods. The discount rate used in the DCF model equals the Company's cost of capital plus a specific reporting unit risk premium.

The results of step one indicated goodwill was impaired at the Company's Mexican Operations as the estimated fair value was less than the carrying value of the reporting unit. As such, step two of the goodwill impairment test was performed to determine the actual amount of goodwill impairment. In this step, the Company was required to allocate the fair value of the reporting unit, as determined in step one, to all the reporting unit's assets and liabilities in a hypothetical purchase price allocation as if the Company's Mexican Operations had been acquired on that date. Upon completion of this step, the Company's original estimate did not change.

The determination of fair value of the reporting units requires the Company to make significant estimates and assumptions. Due to the inherent uncertainty involved in making these estimates, actual results could differ materially for those estimates.

#### Note 5 - Industry Segments

The Company's reportable segments are Plumbing & Refrigeration and Original Equipment Manufacturer (OEM). For disclosure purposes, certain operating segments are aggregated into reportable segments. The Plumbing & Refrigeration segment is composed of Standard Products (SPD), European Operations, and Mexican Operations. The OEM segment is composed of Industrial Products (IPD), Engineered Products (EPD), and Mueller-Xingrong. These segments are classified primarily by the markets for their products. Performance of segments is generally evaluated by their operating income. Intersegment transactions are generally conducted on an arms-length basis.

SPD manufactures copper tube and fittings, plastic fittings, plastic pipe, and line sets. These products are manufactured in the U.S. Outside the U.S., the Company's European Operations manufacture copper tube, which is sold in Europe and the Middle East. SPD also imports and resells brass and plastic plumbing valves, malleable iron fittings, faucets, and plumbing specialty products. Mexican Operations consist of pipe nipple manufacturing and import distribution businesses including product lines of malleable iron fittings and other plumbing specialties. The European Operations consist of copper tube manufacturing, as noted above, and the import distribution of fittings, valves, and plumbing specialties primarily in the U.K. and Ireland. The Plumbing & Refrigeration segment's products are sold primarily to plumbing, refrigeration, and air conditioning wholesalers, hardware wholesalers and co-ops, and building product retailers.

IPD manufactures brass rod, impact extrusions, and forgings as well as a variety of end products including plumbing brass; automotive components; valves and fittings; and specialty copper, copper-alloy, and aluminum tubing. EPD manufactures and fabricates valves and assemblies for the refrigeration, air-conditioning, gas appliance, and barbecue grill markets. Mueller-Xingrong manufactures engineered copper tube primarily for air-conditioning applications. These products are sold primarily to OEM customers.

The change in cumulative foreign currency translation adjustment primarily relates to the Company's investment in foreign subsidiaries and fluctuations in exchange rates between their local currencies and the U.S. dollar. During the third quarter of 2009, the foreign currency translation adjustment was affected by the decrease in the value of the British pound sterling of approximately 3 percent and the decrease in value of the Mexican peso of approximately 1 percent relative to the U.S. dollar. These decreases were partially offset by the increase in the value of the Canadian dollar of approximately 6 percent relative to the U.S. dollar during the third quarter of 2009. During the nine months ended September 26, 2009, the value of the British pound sterling increased approximately 9 percent, the value of the Mexican peso increased approximately 2 percent, and the Canadian dollar increased approximately 12 percent relative to the U.S. dollar.

### Note 7 – Debt

During 2009, the Company repurchased and extinguished \$0.5 million in principal amount of its 6% Subordinated Debentures for \$0.4 million, resulting in a gain of \$0.1 million for the period.

On July 3, 2009, Mueller-Xingrong's secured revolving credit facility (the JV Facility) with an availability of RMB 425 million, or approximately \$62.2 million, became due. All amounts outstanding under the JV Facility were repaid in full on that date with available cash on hand. On July 18, 2009, Mueller-Xingrong entered into a new credit agreement (the JV Credit Agreement) with a syndicate of four banks establishing a secured RMB 267 million, or approximately \$39.1 million, revolving credit facility with a maturity date of July 18, 2010. All other terms of the new JV Credit Agreement were substantially equivalent to the previous JV Facility.

### Note 8 - Employee Benefits

The Company sponsors several qualified and nonqualified pension plans and other postretirement benefit plans for certain of its employees. The components of net periodic benefit cost (income) are as follows:

	For the Quarter Ended					For the Nine Months Ended					
	1 / 1		ember 27, 2008	September 26, 2009		Se	ptember 27, 2008				
(In thousands)											
Pension benefits:											
Service cost	\$	274	\$	529	\$	835	\$	1,776			
Interest cost		2,221		2,548		6,881		8,515			
Expected return on plan assets		(2,878)		(3,744)		(8,622)		(12,499)			
Amortization of prior service cost		76		77		229		256			
Amortization of net loss		122		51		658		180			
Net periodic benefit income	\$	(185)	\$	(539)	\$	(19)	\$	(1,772)			
Other benefits:											
Service cost	\$	59	\$	74	\$	176	\$	237			
Interest cost		302		326		905		1,081			
Amortization of prior service cost		1		1		2		2			
Amortization of net loss		41		54	_	125	_	180			
Net periodic benefit cost	\$	403	\$	455	\$	1,208	\$	1,500			

During 2009, the Company executed a Deed of Amendment (the Amendment) which froze the accrual of future benefits related to its U.K. pension plan. Pursuant to U.K. law, past service accruals will be adjusted for the effects of inflation after the execution of the Amendment. The Amendment had no material impact on the Company's results of operations.

The Company anticipates contributions to its pension plans for 2009 to be approximately \$1.2 million. During the first nine months of 2009, contributions of approximately \$1.0 million have been made to certain pension plans.

### Note 9 - Income Taxes

The Company's effective tax rate for the third quarter of 2009 was 25 percent compared with 31 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the third quarter of 2009 were reductions related to tax contingency changes of \$1.7 million, return-to-provision adjustments of \$0.8 million, the effect of foreign statutory rates different from U.S. and other foreign adjustments of \$0.4 million, the U.S. production activities deduction of \$0.4 million, and other adjustments of \$0.3 million. These items were partially offset by the provision for state income taxes, net of the federal benefit, of \$1.1 million.

The Company's effective tax rate for the first nine months of 2009 was 30 percent compared with 34 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the first nine months of 2009 were changes to tax contingencies of \$1.3 million, the U.S. production activities deduction of \$0.5 million, return-to-provision adjustments of \$0.4 million, the effect of foreign statutory rates different from U.S. and other foreign adjustments of \$0.4 million, and other adjustments of \$0.3 million. These items were partially offset by the provision for state income taxes, net of the federal benefit, of \$1.5 million and valuation allowance changes of \$0.3 million. The change in the valuation allowance for the first nine months of 2009 included the addition of a valuation allowance of \$3.0 million, or 8 cents per diluted share, due to the expectation that a foreign deferred tax asset will not be realized. This expense was partially offset by the reduction of a valuation allowance of \$2.3 million, return to the expectation that a foreign deferred tax asset will not be realized. This expense was partially offset by the reduction of a valuation allowance of \$0.4 million, return to a federal deferred tax asset.

The benefit of \$1.3 million recognized during the first nine months of 2009 for changes in tax contingencies included a reduction for the expiration of statutes of \$2.0 million. This amount was partially offset by other adjustments totaling \$0.7 million. Total unrecognized tax benefits at the end of the first nine months were \$4.2 million, without consideration of any applicable federal benefit, and this amount includes \$0.9 million of accrued interest. The Company includes interest and penalties related to income tax matters as a component of income tax expense. All of the \$4.2 million would impact the effective tax rate, if recognized. Due to ongoing audits and potential lapses of statutes of limitations in various jurisdictions, it is reasonably possible that this reserve may change in the next twelve months by a range of zero dollars to \$2.8 million.

The Company files a consolidated U.S. federal income tax return and files numerous consolidated and separate income tax returns in many state, local, and foreign jurisdictions. The Company is no longer subject to U.S. federal income tax examinations for years before 2006 and with few exceptions is no longer subject to state, local, or foreign income tax examinations by tax authorities for years before 2004. The Internal Revenue Service has concluded its examination of the Company's 2005 and 2006 consolidated U.S. federal income tax returns, the results of which were immaterial to the Company. The Internal Revenue Service is currently examining the Company's 2007 consolidated U.S. federal income tax return, as well as a federal return of an entity acquired by the Company. Additionally, various state and foreign taxing authorities are currently examining a number of the Company's state and foreign income tax returns for years from 2005 forward. The results of these examinations are not expected to have a material impact on the Company's financial position or results of operations.

## Note 11 - Derivative Instruments and Hedging Activities

Copper and brass represent the largest component of the Company's variable costs of production. The cost of these materials is subject to global market fluctuations caused by factors beyond the Company's control. The Company occasionally enters into forward fixed-price arrangements with certain customers; the risk of these arrangements is generally managed with commodity futures contracts. The Company accounts for these futures contracts in accordance with ASC 815 *Derivatives and Hedging* (ASC 815). These futures contracts have been designated as cash flow hedges. The fair value of open futures contracts are recognized as a component of accumulated other comprehensive income until the position is closed which corresponds to the period when the related hedged transaction is recognized in earnings. Should these contracts no longer meet hedge criteria in accordance with ASC 815, either through lack of effectiveness or because the hedged transaction is no longer probable of occurring, all deferred gains and losses related to the hedge will be immediately reclassified from accumulated other comprehensive income into earnings. In the next twelve months, the Company will reclassify into earnings realized gains or losses of cash flow hedges; at September 26, 2009, the net fair value of these contracts was approximately a \$457 thousand gain.

### Table of Contents

At September 26, 2009, the Company held open futures contracts to purchase approximately \$4.8 million of copper over the next seven months related to fixed price sales orders. The fair value of those futures contracts was a \$601 thousand gain position, which was determined by obtaining quoted market prices (Level 1 hierarchy as defined by ASC 820). The Company does not offset fair value of amounts for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral. At September 26, 2009, the Company had recorded restricted cash of \$832 thousand related to open futures contracts.

Derivative instruments designated as hedging instruments under ASC 815 are reflected in the Condensed Consolidated Balance Sheets as follows:

		September 26, 2009						
		Location	Fair	value				
(In thousands)								
	01		¢	(40)				
Commodity contracts	Other current assets:	Gain positions	\$	649				
Commodity contracts		Loss positions		48				
Commodity contracts	Other current liabilities:	Gain positions		2				
Commodity contracts		Loss positions		2				

The following tables summarize activities related to the Company's derivative instruments, classified as cash flow hedges in accordance with ASC 815:

	· · · · ·	oss) Recogni Effective Por		
	E Septe	e Quarter inded ember 26, 2009	Mont Septe	he Nine hs Ended mber 26, 2009

(1) Includes \$345 thousand and \$968 thousand attributable to noncontrolling interest for the quarter and nine months ended September	er 26, 2009, 1	respectively.		
(Gain) Loss Reclassified from Accumulated OCI into	Income (Effe	ective Portio	n). Net of	Tax

	(Gain) Loss Reclassified from Accumulated OCI into inco	me (Effective Portion	), Net of Tax	
		For the Quarter	For the Nine	
		Ended	Months Ended	
		September 26,	September 26,	
	Location	2009	2009	
(In thousands)				
Commodity contracts	Cost of goods sold	\$ (1,026)	\$ 2,420	

The Company enters into futures contracts that closely match the terms of the underlying transactions. As a result, the ineffective portion of the open hedge contracts at September 26, 2009 is not material to the Condensed Consolidated Statements of Income.

#### Note 12 - Other Current Liabilities

Included in other current liabilities were accrued discounts and allowances of \$33.8 million at September 26, 2009 and \$39.2 million at December 27, 2008, and taxes payable of \$9.7 million at September 26, 2009 and \$9.1 million at December 27, 2008.

### Note 13 - Fair Value of Financial Instruments

The carrying amounts for cash and cash equivalents, accounts receivable, and accounts payable approximate fair value due to the short-term maturity of these instruments. At September 26, 2009 and December 27, 2008, the fair value of the Company's debt was estimated at \$161.7 million and \$158.7 million, respectively, primarily using market yields and taking into consideration the underlying terms of the debt. Such fair value was less than the carrying value of debt at September 26, 2009 and December 27, 2008 by \$8.9 million and \$24.2 million, respectively.

### Note 14 - Recently Issued Accounting Standards

Effective July 1, 2009, the Company adopted the Financial Accounting Standards Board (FASB) ASC 105-10, *Generally Accepted Accounting Principles – Overall* (ASC 105-10). ASC 105-10 establishes the FASB Accounting Standards Codification (the Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP). Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative U.S. GAAP for SEC registrants. All guidance contained in the Codification carries an equal level of authority. The Codification superseded all existing non-SEC accounting and reporting standards. All other non-grandfathered, non-SEC accounting literature not included in the Codification is non-authoritative. The FASB will not issue new standards in the form of Statements, FASB Staff Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates (ASUs). The FASB will not consider ASUs as authoritative in their own right. ASUs will serve only to update the Codification, provide background information about the guidance and provide the bases for conclusions on the change(s) in the Codification. References made to FASB guidance throughout this document have been updated for the Codification.

In December 2007, the FASB issued updated guidance for accounting and reporting of noncontrolling interests in financial statements, which is included in ASC 810-10, *Consolidation – Overall.* The updated guidance in ASC 810-10 requires (i) that noncontrolling (minority) interests be reported as a component of stockholders' equity, (ii) that net income attributable to the parent and the noncontrolling interest be separately identified in the Consolidated Statements of Income, (iii) that changes in a parent's ownership interest while the parent retains the controlling interest be accounted for as equity transactions, (iv) that any retained noncontrolling equity investment upon the deconsolidation of a subsidiary be initially measured at fair value, and (v) that sufficient disclosures are provided that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. The Company adopted the updated guidance in ASC 810-10 in the first quarter of 2009. As a result of the adoption, the Company has reported noncontrolling interests as a component of equity in the Condensed Consolidated Balance Sheets and the net income or loss attributable to noncontrolling interests has been separately identified in the Condensed Consolidated Statements of Income. The prior periods presented have also been reclassified to conform to the current classification required by ASC 810-10.

In December 2008, the FASB issued updated guidance related to employers' disclosures regarding postretirement benefit plan assets, which is included in ASC 715-20, *Defined Benefit Plans.* ASC 715-20 provides additional guidance on employers' disclosures about plan assets of a defined benefit pension or other postretirement plan. This updated guidance is effective for financial statements issued for fiscal years ending after December 15, 2009. The adoption of this updated guidance will increase the disclosures in the Notes to the Consolidated Financial Statements related to the assets of the Company's defined benefit pension plans.

During the second quarter of 2009, the Company adopted FASB ASC 855-10, *Subsequent Events – Overall* (ASC 855-10). ASC 855-10 establishes standards for accounting for and disclosing subsequent events (events which occur after the balance sheet date but before financial statements are issued or are available to be issued). ASC 855-10 requires an entity to disclose the date subsequent events were evaluated and whether that evaluation took place on the date financial statements were issued or were available to be issued. The adoption of ASC 855-10 did not have a material impact on the Company's financial condition or results of operations. For the quarterly period ended September 26, 2009, the Company has considered subsequent events through October 21, 2009, which is the date its Condensed Consolidated Financial Statements were filed with the SEC on Form 10-Q.

### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

### **General Overview**

The Company is a leading manufacturer of copper, brass, plastic, and aluminum products. The range of these products is broad: copper tube and fittings; brass and copper alloy rod, bar, and shapes; aluminum and brass forgings; aluminum and copper impact extrusions; plastic pipe, fittings and valves; refrigeration valves and fittings; fabricated tubular products; and steel nipples. The Company also resells imported brass and plastic plumbing valves, malleable iron fittings, faucets and plumbing specialty products. The Company's operations are located throughout the United States, and in Canada, Mexico, Great Britain, and China.

The Company's businesses are aggregated into two reportable segments: the Plumbing & Refrigeration segment and the OEM segment. For disclosure purposes, certain operating segments are aggregated into reportable segments. The Plumbing & Refrigeration segment is composed of the Standard Products Division (SPD), European Operations, and Mexican Operations. The OEM segment is composed of the Industrial Products Division (IPD), Engineered Products Division (EPD), and Mueller-Xingrong, the Company's Chinese joint venture. Certain administrative expenses and expenses related primarily to retiree benefits at inactive operations are combined into the Corporate and Eliminations classification. These reportable segments are described in more detail below.

SPD manufactures and sells copper tube, copper and plastic fittings, plastic pipe, line sets, and valves in North America and sources products for import distribution in North America. European Operations manufactures copper tube in Europe, which is sold in Europe and the Middle East; activities also include import distribution in the U.K. and Ireland. Mexican Operations include pipe nipple manufacturing and import distribution businesses including product lines of malleable iron fittings and other plumbing specialties. The Plumbing & Refrigeration segment sells products to wholesalers in the HVAC (heating, ventilation, and air-conditioning), plumbing, and refrigeration markets, to distributors to the manufactured housing and recreational vehicle industries, and to building material retailers.

The OEM segment manufactures and sells brass and copper alloy rod, bar, and shapes; aluminum and brass forgings; aluminum and copper impact extrusions; refrigeration valves and fittings; fabricated tubular products; and gas valves and assemblies. Mueller-Xingrong manufactures engineered copper tube for refrigeration applications; these products are sold primarily to OEM's located in China. The OEM segment sells its products primarily to original equipment manufacturers, many of which are in the HVAC, plumbing, and refrigeration markets.

New housing starts and commercial construction are important determinants of the Company's sales to the HVAC, refrigeration, and plumbing markets because the principal end use of a significant portion of the Company's products is in the construction of single and multi-family housing and commercial buildings. Repairs and remodeling projects are also important factors affecting the underlying demand for these products.

The majority of the Company's manufacturing facilities operated at significantly below capacity during 2008 and have continued to do so during the nine months ended September 26, 2009. This is due to the reduced demand for the Company's products arising from the continued decline in general economic conditions in the U.S. and in foreign markets that the Company serves. The U.S. housing and residential construction market has been adversely affected in the current economic downturn. According to the U.S. Census Bureau, new housing starts were 431 thousand in the nine months ended September 26, 2009, which is a 43 percent decrease from the same period in the prior year. The September 2009 seasonally adjusted annual rate of new housing starts was 590 thousand, representing a 28 percent decline from the September 2008 rate. While commercial construction has been more stable, it also has begun to decline. According to the U.S. Census Bureau, the August 2009 seasonally adjusted annual rate of Nonresidential Value of Construction Put in Place was \$684.5 billion of which \$372.6 billion was private; this is a decrease compared with \$718.2 billion and \$416.2 billion, respectively, at August 2008. Business conditions in the U.S. automotive industry have also been exceptionally difficult in the recent economic downturn, which has also affected the demand for various products in the Company's OEM segment. These conditions have significantly affected the demand for virtually all of the Company's core products.

Profitability of certain of the Company's product lines depends upon the "spreads" between the cost of raw material and the selling prices of its completed products. The open market prices for copper cathode and scrap, for example, influence the selling price of copper tubing, a principal product manufactured by the Company. The Company attempts to minimize the effects on profitability from fluctuations in material costs by passing through these costs to its customers. The Company's earnings and cash flow are dependent upon these spreads that fluctuate based upon market conditions.

Earnings and profitability are also impacted by unit volumes that are subject to market trends such as substitute products and imports, and market share. Plastic plumbing systems are the primary substitute product; these products represent an increasing share of consumption. U.S. consumption of copper tubing is still predominantly supplied by U.S. manufacturers, although imports from Mexico and China are significant. Brass rod consumption in the U.S. has steadily declined over the past five years, due to the outsourcing of many manufactured products as well as the current economic conditions.

### **Results of Operations**

### Third Quarter 2009 compared with Third Quarter 2008

During the third quarter of 2009, the Company's net sales were \$419.9 million, which compares with net sales of \$665.5 million over the same period of 2008. The decrease was due to reduced unit sales volume across the majority of the Company's product lines as a result of reduced demand arising from current economic conditions. Selling prices have also decreased due to the decreased average costs of raw materials during the period, which are generally passed on to customers. The Comex average price of copper, the Company's principal raw material, was \$2.67 per pound in the third quarter of 2009, compared with \$3.45 in the same period of 2008.

Cost of goods sold decreased from \$588.5 million in the third quarter of 2008 to \$354.0 million in the same period of 2009. The decrease was primarily due to decreased sales volume, lower average costs of raw materials, and reduced aggregate conversion costs as a result of lower production levels. Additionally, included in cost of goods sold for the third quarter of 2008 was a charge for the write-down of certain inventories totaling \$3.3 million resulting primarily from the open market price of copper falling below the inventories' net book value. Depreciation and amortization decreased to \$10.4 million in the third quarter of 2009 from \$11.5 million in the third quarter of 2008 keets becoming fully depreciated during 2008. Selling, general, and administrative expense was \$27.6 million for the third quarter of 2009 compared with \$35.7 million for the same period of 2008. The decrease was primarily due to decreased employment costs resulting from reduced headcount, reduced management incentive compensation, and reduced in sales and distribution expenses resulting from lower sales volume. Total headcount has declined from approximately 4,643 employees in September 2008 to approximately 3,593 employees in September 2009.

Interest expense for the third quarter of 2009 totaled \$2.4 million, compared with \$5.1 million for the same period of 2008. The decrease was primarily due to lower interest expense following the early extinguishment of a portion of the Company's 6% Subordinated Debentures in 2008 and 2009. Other (expense) income, net was \$0.3 million expense for the third quarter of 2009 compared with \$2.6 million income for the same period of 2008. The change from the prior year was primarily due to decreased interest income resulting from lower interest rates.

The Company's effective tax rate for the third quarter of 2009 was 25 percent compared with 31 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the third quarter of 2009 were reductions related to tax contingency changes of \$1.7 million, return-to-provision adjustments of \$0.8 million, the effect of foreign statutory rates different from U.S. and other foreign adjustments of \$0.4 million, the U.S. production activities deduction of \$0.4 million, and other adjustments of \$0.3 million. These items were partially offset by the provision for state income taxes, net of the federal benefit, of \$1.1 million.

### Plumbing & Refrigeration Segment

Net sales by the Plumbing and Refrigeration segment were \$240.9 million in the third quarter of 2009 which is approximately a 35 percent decrease from \$371.3 million for the same period in 2008. The decrease was due to decreased sales volume in the majority of the segment's product lines as a result of weak demand arising from general economic conditions and decreased selling prices resulting from lower average raw material costs. Other factors adversely affecting the segment's sales volumes included production losses resulting from a fire at the European copper tube operation in November 2008 and an explosion at the Fulton, Mississippi copper tube mill in July 2009. Of the \$130.4 million decrease in net sales, approximately \$73.9 million was attributable to lower unit volume and \$41.2 million was due to lower selling prices in the segment's core product lines consisting primarily of copper tube, line sets, and fittings. Cost of goods sold decreased from \$313.8 million in the third quarter of 2008 to \$200.0 million in the third quarter of 2009. This decrease resulted from lower sales volume, decreased raw material costs, and reduced aggregate conversion costs from reductions in production levels. Also included in cost of goods sold for the third quarter of 2009 from \$7.3 million in the same period of 2008 due to several production assets becoming fully depreciated during 2008. Selling, general, and administrative expense decreased to \$18.3 million in the third quarter of 2009 from \$24.8 million in the third quarter of 2008. This decreased employment costs from headcount reductions and lower aggregate sales and distribution expense resulting from lower sales volume. Operating income for the segment decreased from \$25.4 million in the third quarter of 2009 due primarily to lower sales volume and decreased unit spreads in copper tube, partially offset by savings from reduced employment costs.

#### OEM Segment

Net sales for the OEM segment declined approximately 39 percent to \$181.6 million in the third quarter of 2009 from \$299.5 million in the third quarter of 2008. The decrease was due primarily to lower sales volume and lower selling prices resulting from lower average costs of raw materials. Of the \$117.9 million decrease in net sales, approximately \$64.1 million was attributable to lower unit volume and \$43.3 million was due to lower selling prices in the segment's core product lines consisting primarily of brass rod, forgings, and commercial tube. Cost of goods sold decreased from \$279.7 million in the third quarter 2008 to \$156.4 million in the third quarter of 2009. The decrease was due primarily to lower sales volume, lower raw material costs, and lower aggregate conversion costs resulting from reductions in production levels. Also included in cost of goods sold for the third quarter of 2008 was a charge of \$0.9 million to write down certain inventories to the lower of cost or market. Depreciation and amortization in the third quarter of 2009 remained relatively consistent with the same period in 2008. Selling, general, and administrative expense also remained consistent in the third quarter of 2009 owner end were meloyment costs from reduced headcounts offset by increased pension costs resulting from reduced investment returns. Operating income for the segment increased from \$10.6 million in the third quarter of 2008 to \$16.5 million in the third quarter of 2009 due primarily to improved unit spreads, especially in the segment's brass rod operations, and decreased employment costs, partially of set by reduced sales volumes.

### Nine Months Ended September 26, 2009 compared with Nine Months Ended September 27, 2008

During the nine months ended September 26, 2009, the Company's net sales were \$1.11 billion, which compares with net sales of \$2.12 billion over the same period of 2008. The decrease was due to reduced unit sales volume across the majority of the Company's product lines as a result of reduced demand arising from current economic conditions. Selling prices have decreased due to the decreased average costs of raw materials during the period, which are generally passed on to customers. The Comex average price of copper was \$2.13 per pound in the first nine months of 2009, compared with \$3.59 in the same period of 2008.

Cost of goods sold decreased from \$1.86 billion in the first nine months of 2008 to \$954.8 million in the same period of 2009. The decrease was primarily due to decreased sales volume, lower average costs of raw materials, and reduced aggregate conversion costs as a result of reduced production levels. Additionally, included in cost of goods sold for the nine-month period ended September 27, 2008 was a charge for the write-down of certain inventories totaling \$3.3 million resulting primarily from the open market price of copper falling below the inventories' net book value. Depreciation and amortization decreased to \$31.3 million for the nine months ended September 26, 2009 from \$33.5 million for the same period of 2008 due to several assets becoming fully depreciated during 2008. Selling, general, and administrative expense was \$89.1 million for the first nine months of 2009 compared with \$108.6 million for the same period of 2008. The decrease was primarily due to decreased employment costs resulting from reduced headcount, reduced management incentive compensation, and reductions in sales and distribution expenses resulting from lower sales volume. Total headcount has declined from approximately 4,643 employees in September 2008.

Interest expense for the nine months ended September 26, 2009 totaled \$7.6 million, compared with \$15.8 million for the same period of 2008. The decrease was attributable to lower interest expense following the early extinguishment of a portion of the Company's 6% Subordinated Debentures in 2008 and 2009. Other income, net was \$0.7 million for the nine months ended September 26, 2009 compared with \$9.1 million for the same period of 2008. The current year decrease was primarily due to decreased interest income resulting from lower interest rates.

The Company's effective tax rate for the first nine months of 2009 was 30 percent compared with 34 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the first nine months of 2009 were changes to tax contingencies of \$1.3 million, the U.S. production activities deduction of \$0.5 million, return-to-provision adjustments of \$0.4 million, the effect of foreign statutory rates different from U.S. and other foreign adjustments of \$0.4 million, and other adjustments of \$0.7 million. These items were partially offset by the provision for state income taxes, net of the federal benefit, of \$1.5 million and valuation allowance changes of \$0.3 million. The change in the valuation allowance for the first nine months of 2009 included the addition of a valuation allowance of \$3.0 million, or 8 cents per diluted share, due to the expectation that a foreign deferred tax asset will not be realized. This expense was partially offset by the reduction of a valuation allowance of \$2.3 million, retate to a federal deferred tax asset.

### Plumbing & Refrigeration Segment

Net sales by the Plumbing and Refrigeration segment were \$661.0 million in the first nine months of 2009, which is approximately a 43 percent decrease from \$1.16 billion for the same period in 2008. The decrease was due to decreased sales volume in the majority of the segment's product lines as a result of weak demand stemming from current economic conditions and decreased selling prices resulting from lower average raw material costs. Other factors adversely affecting the segment's sales volumes include production losses resulting from a fire at the European copper tube operation in November 2008 and an explosion at the Fulton, Mississippi copper tube mill in July 2009. Of the \$498.6 million decrease in net sales, approximately \$213.2 million was attributable to lower unit volume and \$231.6 million was due to lower selling prices in the segment's core product lines consisting primarily of copper tube, line sets, and fittings. Cost of goods sold decreased from \$981.9 million in the first nine months of 2009. This decrease resulted from lower sales volume, decreased raw material costs, and reduced aggregate conversion costs from reductions in production levels. This decrease was partially offset by a provision of \$2.4 million, or 4 cents per diluted share after tax, as a result of additional loss contingencies that management deemed to become probable and estimable during the first nine months of 2009. Also included in cost of goods sold for the nine months ended September 27, 2008 was a charge of \$2.4 million to write down certain inventories to the lower of cost or market. Depreciation and amortization decreased to \$19.8 million in the nine months ended September 26, 2009 from \$21.8 million in the same period of 2008 due to several production assets becoming fully depreciated during 2008. Selling, general, and administrative expense decreased to \$57.7 million in the first nine months of 2009 from \$70.0 million in the same period of 2008. This decrease was primarily due to decreased from \$85.9 million in the fi

#### OEM Segment

Net sales for the OEM segment declined approximately 53 percent to \$459.9 million in the nine months ended September 26, 2009 from \$979.7 million in same period of 2008. The decrease was due primarily to lower sales volume and lower selling prices resulting from lower average costs of raw materials. Of the \$519.8 million decrease in net sales, approximately \$351.7 million was attributable to lower unit volume and \$134.3 million was due to lower selling prices in the segment's core product lines consisting primarily of brass rod, forgings, and commercial tube. Cost of goods sold decreased from \$894.9 million in the first nine months of 2008 to \$415.2 million in the same period of 2009. The decrease was due primarily to lower sales volume, lower raw material costs, and lower aggregate conversion costs resulting from reductions in production levels. Also included in cost of goods sold for the nine months ended September 27, 2008 was a charge of \$0.9 million to write down certain inventories to the lower of cost or market. Depreciation and amortization remained relatively consistent. Selling, general, and administrative expense decreased from \$18.7 million for the nine months ended September 27, 2008 to \$15.7 million in same period of 2009 due primarily to reduced bad debt expense and decreased employment costs associated with headcount reductions. Operating income for the segment decreased from \$55.2 million in the first nine months of 2008 to \$18.3 million in the first nine months of 2009 due primarily to lower sales volumes partially offset by improved unit spreads at our brass rod operations and reduced employment costs.

### Liquidity and Capital Resources

Cash provided by operating activities during the nine months ended September 26, 2009 totaled \$84.4 million; which was primarily attributable to net income plus depreciation and amortization and decreased inventories, partially offset by increased receivables and decreased current liabilities. Fluctuations in the cost of copper and other raw materials affect the Company's liquidity. Changes in material costs directly impact components of working capital, primarily inventories and accounts receivable. During the nine months ended September 26, 2009, the average Comex copper price was approximately \$2.13 per pound, which represented a 41 percent decrease over the average price for the same period in 2008. This decrease in the price of cathode has also resulted in sharp decreases in the open market price for copper scrap and, to a lesser extent, the price of brass scrap. However, during the third quarter of 2009, the average cost of copper increased to \$2.67 per pound from the average of the previous two quarters of 2009 of \$1.86 per pound, which has affected the investment in working capital.

During the first nine months of 2009, cash provided by investing activities totaled \$2.4 million, which consisted of net reductions to restricted cash deposits of \$12.8 million and proceeds from sales of properties of \$0.6 million, partially offset by capital expenditures of \$11.0 million. Cash used in financing activities during the first nine months of 2009 totaled \$16.4 million, which primarily consisted of (i) the net reduction in Mueller-Xingrong's working capital debt facility of \$11.8 million, (ii) dividends paid to the Company's stockholders of \$11.2 million, and (iii) dividends paid by Mueller-Xingrong to its noncontrolling stockholders of \$1.4 million. These amounts were partially offset by proceeds of \$8.7 million from the issuance of shares related to stock options exercised during the period.

The Company has a \$200 million unsecured line-of-credit (Credit Facility) which expires in December 2011. At September 26, 2009, the Company had no borrowings against the Credit Facility. The Credit Facility backed approximately \$9.9 million in letters of credit at the end of the third quarter of 2009. As of September 26, 2009, the Company's total debt was \$170.6 million or 18.8 percent of its total capitalization (excluding noncontrolling interest). During 2009, the Company purchased and extinguished \$0.5 million of its 6% Subordinated Debentures for \$0.4 million, resulting in a gain of \$0.1 million for the period.

On July 3, 2009, Mueller-Xingrong's secured revolving credit facility (the JV Facility) with an availability of RMB 425 million, or approximately \$62.2 million, became due. All amounts outstanding under the JV Facility were repaid in full on that date with available cash on hand. On July 18, 2009, Mueller-Xingrong entered into a new credit agreement (the JV Credit Agreement) with a syndicate of four banks establishing a secured RMB 267 million, or approximately \$39.1 million, revolving credit facility with a maturity date of July 18, 2010. All other terms of the new JV Credit Agreement were substantially equivalent to the previous JV Facility.

Covenants contained in the Company's financing obligations require, among other things, the maintenance of minimum levels of tangible net worth and the satisfaction of certain minimum financial ratios. As of September 26, 2009, the Company was in compliance with all of its debt covenants.

The Company declared and paid a regular quarterly cash dividend of ten cents per common share in each of the first three quarters of 2009. Payment of dividends in the future is dependent upon the Company's financial condition, cash flows, capital requirements, earnings, and other factors. On November 1, 2009, the Company will pay approximately \$4.4 million in interest on the Debentures that remain outstanding.

Management believes that cash provided by operations and currently available cash of \$353.9 million will be adequate to meet the Company's normal future capital expenditures and operational needs. The Company's current ratio was 4.4 to 1 at September 26, 2009.

The Company's Board of Directors has extended, until October 2010, its authorization to repurchase up to ten million shares of the Company's common stock through open market transactions or through privately negotiated transactions. The Company has no obligation to repurchase any shares and may cancel, suspend, or extend the time period for the repurchase of shares at any time. Any repurchases will be funded primarily through existing cash and cash from operations. The Company may hold any shares repurchased in treasury or use a portion of the repurchased shares for employee benefit plans, as well as for other corporate purposes. From its initial authorization in 1999 through September 26, 2009, the Company had repurchased approximately 2.4 million shares under this authorization. In addition, the Company may repurchase portions of its 6% Subordinated Debentures through open market transactions or through privately negotiated transactions.

There have been no significant changes in the Company's contractual cash obligations reported at December 27, 2008.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to market risk from changes in raw material and energy costs, interest rates, and foreign currency exchange rates. To reduce such risks, the Company may periodically use financial instruments. All hedging transactions are authorized and executed pursuant to policies and procedures. The Company does not buy or sell financial instruments for trading purposes.

### Cost and Availability of Raw Materials and Energy

Copper and brass represent the largest component of the Company's variable costs of production. The cost of these materials is subject to global market fluctuations caused by factors beyond the Company's control. Significant increases in the cost of metal, to the extent not reflected in prices for the Company's finished products, or the lack of availability could materially and adversely affect the Company's business, results of operations and financial condition.

The Company occasionally enters into future fixed-price arrangements with certain customers. The Company may utilize futures contracts to hedge risks associated with future fixed-price arrangements. The Company may also utilize futures contracts to manage price risk associated with inventory. Depending on the nature of the hedge, changes in the fair value of the futures contracts will either be offset against the change in fair value of the inventory through earnings or recognized as a component of accumulated other comprehensive income and reflected in earnings upon the sale of inventory. Periodic value fluctuations of the contracts generally offset the value fluctuations of the underlying fixed-price transactions or inventory. At September 26, 2009, the Company held open futures contracts to purchase approximately \$4.8 million of copper through April 2010 related to fixed-price sales orders.

Futures contracts may also be used to manage price risk associated with natural gas purchases. The effective portion of gains and losses with respect to these positions are deferred in stockholders' equity as a component of accumulated other comprehensive income and reflected in earnings upon consumption of natural gas. Periodic value fluctuations of the underlying natural gas prices. At September 26, 2009, the Company held no open futures contracts to purchase natural gas.

### **Interest Rates**

At September 26, 2009, the Company had variable-rate debt outstanding of \$22.4 million, which related to the debt issued by Mueller-Xingrong and two Industrial Revenue Bonds with the State of Mississippi. At these borrowing levels, a hypothetical 10 percent increase in interest rates would have had an insignificant unfavorable impact on the Company's pre-tax earnings and cash flows. The primary interest rate exposure on floating-rate debt is based on LIBOR and on the base lending rate published by the People's Bank of China.

#### **Foreign Currency Exchange Rates**

Foreign currency exposures arising from transactions include firm commitments and anticipated transactions denominated in a currency other than an entity's functional currency. The Company and its subsidiaries generally enter into transactions denominated in their respective functional currencies. Foreign currency exposures arising from transactions denominated in currencies other than the functional currency are not material; however, the Company may utilize certain futures contracts to hedge such transactional exposures. Gains and losses with respect to these positions are deferred in stockholders' equity as a component of accumulated other comprehensive income and reflected in earnings upon collection of receivables. At September 26, 2009, the Company held no open foreign currency futures contracts.

The Company's primary foreign currency exposure arises from foreign-denominated revenues and profits and their translation into U.S. dollars. The primary currencies to which the Company is exposed include the Canadian dollar, the British pound sterling, the euro, the Mexican peso, and the Chinese renminbi. The Company generally views as long-term its investments in foreign subsidiaries with a functional currency other than the U.S. dollar. As a result, the Company generally does not hedge these net investments.

#### **Cautionary Statement Regarding Forward Looking Information**

Statements in this Quarterly Report on Form 10-Q that are not strictly historical may be "forward-looking" statements, which involve risks and uncertainties. These include economic and currency conditions, continued availability of raw materials and energy, market demand, pricing, competitive and technological factors, and the availability of financing, among others, as set forth in the Company's filings with the Securities and Exchange Commission (SEC). The words "outlook," "estimate," "project," "intend," "expect," "believe," "target," and similar expressions are intended to identify forward-looking statements. The reader should not place undue reliance on forward-looking statements, which speak only as of the date of this report. The Company has no obligation to publicly update or revise any forward-looking statements to reflect events after the date of this report.

#### **Item 4. Controls and Procedures**

### **Evaluation of Disclosure Controls and Procedures**

The Company maintains disclosure controls and procedures designed to ensure information required to be disclosed in Company reports filed under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures pursuant to Rule 13a-15(b) of the Exchange Act as of the end of the period covered by this report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of September 26, 2009 to ensure that information required to be disclosed in Company reports filed under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and (ii) accumulated and communicated to management, including the Company's principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

### **Changes in Internal Control over Financial Reporting**

There were no changes in the Company's internal control over financial reporting during the Company's fiscal quarter ending September 26, 2009, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. As disclosed in its previous filing, the Company completed the implementation of the transaction processing system currently used by its U.S. operations for its Mexican operations in the second quarter of 2009.

### PART II. OTHER INFORMATION

#### Item 1. Legal Proceedings

#### General

The Company is involved in certain litigation as a result of claims that arose in the ordinary course of business. Additionally, the Company may realize the benefit of certain legal claims and litigation in the future; these gain contingencies are not recognized in the Condensed Consolidated Financial Statements.

## **Copper Tube Antitrust Litigation**

The Company has been named as a defendant in several pending litigations (the Copper Tube Actions) brought by direct and indirect purchasers of various forms of copper tube. The Copper Tube Actions allege anticompetitive activities with respect to the sale of copper plumbing tubes (copper plumbing tubes) and/or copper tubes used in, among other things, the manufacturing of air-conditioning and refrigeration units (ACR copper tubes). All of the Copper Tube Actions seek monetary and other relief.

### Carrier ACR Tube Action

A Copper Tube Action (the Carrier ACR Tube Action) was filed in March 2006 in the United States District Court for the Western District of Tennessee by Carrier Corporation, Carrier S.A., and Carrier Italia S.p.A. (collectively, Carrier). The Carrier ACR Tube Action alleges anticompetitive activities with respect to the sale to Carrier of ACR copper tubes. The Company and Mueller Europe Limited (Mueller Europe) are named in the Carrier ACR Tube Action.

In July 2007, the Carrier ACR Tube Action was dismissed in its entirety for lack of subject matter jurisdiction as to all defendants. In August 2007, plaintiffs filed with the United States Court of Appeals for the Sixth Circuit a notice of appeal from the judgment and order dismissing the complaint in the Carrier ACR Tube Action. The Company and Mueller Europe filed notices of cross-appeal in August 2007.

In October 2007, Carrier filed with the United States Court of Appeals for the Sixth Circuit a motion to dismiss the cross-appeals, which the Court denied in December 2007. All appeals in the Carrier ACR Tube Action remain pending. Briefing on the appeals occurred in May 2009 and oral argument took place in October 2009.

#### Indirect-Purchaser ACR Tube Action

Two Copper Tube Actions were filed in June and August 2006 in the United States District Court for the Western District of Tennessee and were consolidated to become the Indirect-Purchaser ACR Tube Action. The Indirect-Purchaser ACR Tube Action is a purported class action brought on behalf of indirect purchasers of ACR copper tubes in the United States and alleges anticompetitive activities with respect to the sale of ACR copper tubes. The Company and Mueller Europe are named in the Indirect-Purchaser ACR Tube Action. The Company and Mueller Europe have been served, but have not yet been required to respond, in the Indirect-Purchaser ACR Tube Action.

#### Indirect-Purchaser Copper Tube Action

A Copper Tube Action (the Indirect-Purchaser Copper Tube Action) was filed in July 2006 in the United States District Court for the Northern District of California. The Indirect-Purchaser Copper Tube Action is a purported class action brought on behalf of indirect purchasers of copper plumbing tubes and ACR copper tubes in the United States and alleges anticompetitive activities with respect to the sale of both copper plumbing tubes and ACR copper tubes.

The Company, Mueller Europe, WTC Holding Company, Inc. (WTC Holding Company), Deno Holding Company, Inc. (Deno Holding Company), and Deno Acquisition Eurl are named in the Indirect-Purchaser Copper Tube Action. The Company, Mueller Europe, WTC Holding Company, and Deno Holding Company have been served, but have not yet been required to respond, in the Indirect-Purchaser Copper Tube Action. Deno Acquisition Eurl has not been served with the complaint in the Indirect-Purchaser Copper Tube Action.

### Indirect-Purchaser Plumbing Tube Action

Four Copper Tube Actions were filed in October 2004 in state court in California and were consolidated to become the Indirect-Purchaser Plumbing Tube Action. The Indirect-Purchaser Plumbing Tube Action is a purported class action brought on behalf of indirect purchasers of copper plumbing tubes in California and alleges anticompetitive activities with respect to the sale of copper plumbing tubes. The Company, Mueller Europe, WTC Holding Company, Deno Holding Company, and Deno Acquisition Eurl are named in the Indirect-Purchaser Plumbing Tube Action. Deno Acquisition Eurl has not been served with the complaint in the Indirect-Purchaser Plumbing Tube Action.

The claims against WTC Holding Company and Deno Holding Company have been dismissed without prejudice in the Indirect-Purchaser Plumbing Tube Action. Mueller Europe has not yet been required to respond in the Indirect-Purchaser Plumbing Tube Action. The Company's demurrer to the complaint has been filed in the Indirect-Purchaser Plumbing Tube Action.

In October 2009, the court overseeing the Indirect-Purchaser Plumbing Tube Action has granted the parties' motion for preliminary approval of a class-action settlement. A hearing on the motion for final approval of the class-action settlement is scheduled for February 2010.

Although the Company believes that the claims for relief in the Copper Tube Actions are without merit, due to the procedural stage of the Copper Tube Actions, the Company is unable to determine the likelihood of a material adverse outcome in the Copper Tube Actions or the amount or range of a potential loss in the Copper Tube Actions.

### **Canadian Dumping and Countervail Investigation**

In June 2006, the Canada Border Services Agency (CBSA) initiated an investigation into the alleged dumping of certain copper pipe fittings from the United States and from South Korea, and the dumping and subsidizing of these same goods from China. The Company and certain affiliated companies were identified by the CBSA as exporters and importers of these goods.

On January 18, 2007, the CBSA issued a final determination in its investigation. The Company was found to have dumped subject goods during the CBSA's investigation period. On February 19, 2007, the Canadian International Trade Tribunal (CITT) concluded that the dumping of the subject goods from the United States had caused injury to the Canadian industry.

As a result of these findings, exports of subject goods to Canada by the Company made on or after October 20, 2006 have been subject to antidumping measures. Under Canada's system of prospective antidumping enforcement, the CBSA has issued normal values to the Company. Antidumping duties will be imposed on the Company's Canadian customers only to the extent that the Company's future exports of copper pipe fittings are made at net export prices which are below these normal values. If net export prices for subject goods exceed normal values, no antidumping duties will be payable. These measures will remain in place for five years, at which time an expiry review will be conducted by Canadian authorities to determine whether these measures should be maintained for another five years or allowed to expire.

On August 27, 2008 the CBSA completed a review process pursuant to which revised normal values were issued to exporters of subject goods, including the Company. Given that these normal values are calculated on the basis of sales and cost data provided by the Company and given that the cost of copper has declined significantly since the issuance of the normal values in August 2008, the Company has experienced a decrease in its sales volumes of copper pipe fittings subject to the dumping order since the fourth quarter of 2008. However, given the small percentage of its products that are sold for export to Canada, the Company does not anticipate any material adverse effect on its financial condition as a result of the antidumping case in Canada.

Mueller's normal values are subject to potential review and revision in the future. Depending on the level of these revised normal values, the Company's ability to compete in Canada could be affected although, as discussed above, export sales to Canada comprise only a small percentage of the Company's total sales. The "sunset review" process, pursuant to which Canadian authorities will examine whether the dumping order should be revoked or maintained for another five years, will initiate in April 2011.

#### United States Department of Commerce Antidumping Review

On December 24, 2008, the United States Department of Commerce (DOC) initiated an antidumping administrative review of the antidumping duty order covering circular welded non-alloy steel pipe and tube from Mexico. The review will determine the final antidumping duties owed, if any, on U.S. imports by certain subsidiaries of the Company during the period November 1, 2007 through October 31, 2008, pursuant to the existing antidumping duty order. DOC has selected Mueller Comercial de Mexico, S. de R.L. de C.V. (Mueller Comercial) as a respondent in this proceeding. On May 29, 2009, Mueller Comercial notified DOC that it would no longer participate in the review. The Company anticipates that certain of its subsidiaries will incur additional antidumping duties on subject imports made during the review period. The Company does not anticipate any material adverse effect on its financial position as a result of this review, and believes it has adequately provided for such exposure.

### **Employment Litigation**

On June 1, 2007, the Company filed a lawsuit in the Circuit Court of Dupage County, Illinois against Peter D. Berkman and Jeffrey A. Berkman, former executives of the Company and B&K Industries, Inc. (B&K), a wholly owned subsidiary of the Company, relating to their alleged breach of fiduciary duties and contractual obligations to the Company through, among other things, their involvement with a supplier of B&K during their employment with B&K. The lawsuit alleges appropriation of corporate opportunities for personal benefit, failure to disclose competitive interests or other conflicts of interest, and unfair competition, as well as breach of employment agreements in connection with the foregoing. The lawsuit seeks compensatory and punitive damages, and other appropriate relief. In August 2007, the defendants filed an answer to the complaint admitting Peter Berkman had not sought authorization to have an ownership interest in a supplier, and a counterclaim against the Company, B&K and certain of the Company's officers and directors alleging defamation, tortious interference with prospective economic relations, and conspiracy, and seeking damages in unspecified amounts. In September 2007, Homewerks Worldwide LLC, an entity formed by Peter Berkman, filed a complaint as an intervenor based on substantially the same allegations included in the Berkmans' counterclaim. In October 2007, the Company also filed a motion seeking to have the Berkmans' counterclaim dismissed as a matter of law. On January 3, 2008, the Court overruled that motion and the case proceeded to discovery of the relevant facts. Since that time, depositions and document productions have been ongoing. However, on September 5, 2008, Peter Berkman withdrew prior responses to discovery requests and asserted the Fifth Amendment privilege against self-incrimination as to all requests directed to him. By that assertion, he took the position that his testimony about his actions would have the potential of exposing him to a criminal charge or criminal charges. On October 3, 2008, in response to a motion to compel filed by the Company, the Court held that Peter Berkman could not withhold documents on Fifth Amendment grounds, amongst other things. Peter Berkman moved for reconsideration of that order and his request was denied on November 19, 2008. On December 10, 2008, Peter Berkman moved for the opportunity to file an interlocutory appeal regarding the Court's ruling on the Company's motion to compel. On January 7, 2009, the motion for interlocutory appeal was granted, the Court found Peter Berkman in contempt for resisting discovery, and Peter Berkman has since filed a notice of appeal with the Illinois Appellate Court, Second Judicial District. All appellate briefs were submitted, oral argument took place on September 29, 2009, and the Company is currently awaiting a decision regarding the issues that were appealed. On October 24, 2008, the defendants filed a motion seeking leave to interpose an Amended Answer and Amended Counterclaims. On December 19, 2008, the Company filed an answer to the Amended Counterclaims that included a new affirmative defense based on the assertion of the Fifth Amendment by Peter Berkman. The Company believes that the counterclaims are without merit and intends to defend them vigorously. The Company does not anticipate any material adverse effect on its business or financial condition as a result of this litigation.

#### **Environmental Matters**

#### Southeast Kansas Sites

By letter dated October 10, 2006, the Kansas Department of Health and Environment (KDHE) advised the Company that environmental contamination has been identified at a former smelter site in southeast Kansas. KDHE asserts that the Company is a corporate successor to an entity that is alleged to have owned and operated the smelter from 1915 to 1918. The Company has since been advised of possible connection between that same entity and two other former smelter sites in Kansas. KDHE has requested that the Company and another potentially responsible party (PRP) negotiate a consent order with KDHE to address contamination at these sites. The Company has participated in preliminary discussions with KDHE and the other PRP. The Company believes it is not liable for the contamination but as an alternative to litigation, the Company has entered into settlement negotiations with the other PRP. The negotiations are ongoing.

### Shasta Area Mine Sites

Mining Remedial Recovery Company (MRRC), a wholly owned subsidiary of the Company, owns certain inactive mines in Shasta County, California. MRRC has continued a program, begun in the late 1980's, of sealing mine portals with concrete plugs in mine adits which were discharging water. The sealing program has achieved significant reductions in the metal load in discharges from these adits; however, additional reductions are required pursuant to a series of orders issued by the California Regional Water Quality Control Board (QCB). The remedial activities performed by MRRC have reduced impacts of acid rock drainage; however full compliance has not been achieved. The QCB is presently renewing MRRC's discharge permit and will concurrently issue a new order.

#### U.S.S. Lead

U.S.S. Lead Refinery, Inc., (Lead Refinery), a wholly owned subsidiary of MRRC, has been conducting remedial actions pursuant to a Consent Order with the U.S. Environmental Protection Agency (EPA) pursuant to Section 3008(h) of the Resource Conservation and Recovery Act. The Consent Order requires corrective action at Lead Refinery's East Chicago, Indiana site and provides for Lead Refinery to complete certain on-site interim remedial activities and studies that extend off-site. Site activities, which began in December 1996, have been substantially concluded. Lead Refinery's ongoing monitoring and maintenance activities at this site are handled pursuant to a post-closure permit issued by the Indiana Department of Environmental Management (IDEM) effective as of January 22, 2008. EPA has informed Lead Refinery that the Consent Order would be terminated upon issuance of the IDEM post-closure permit in effect. On April 9, 2009, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), the EPA added the Lead Refinery site to the National Priorities List (NPL). The NPL is a list of priority sites where EPA has determined that there has been a release or threatened release of contaminants that warrant investigation and, if appropriate, remedial action. The NPL does not assign liability to any party or to the owner of a property placed on the NPL. The placement of a site on the NPL does not necessarily mean that remedial action must be taken. The Company is unable to determine the likelihood of a material adverse outcome or the amount or range of a potential loss with respect to placement of this site on the NPL. Lead Refinery lacks the financial resources needed to undertake any investigations or remedial action that may be required by EPA pursuant to CERCLA.

28

### Eureka Mills Site

In November 2008, the Company received a general notice of liability and second request for information under CERCLA from the EPA concerning the Eureka Mills Superfund Site (the Eureka Mills Site) located in Juab County, Utah. The Eureka Mills Site is an area where mining and milling of various metals occurred over the course of several decades. The EPA has been investigating and remediating contamination associated with these activities. The Company's predecessor, Sharon Steel Corporation, acquired land within the Eureka Mills Site from UV Industries, Inc. in 1979. Pursuant to the court-approved 1990 bankruptcy plan of reorganization for Sharon Steel Corporation, the land was transferred by the Company to Amwest Exploration Company, a wholly owned subsidiary of the Company, which later sold the land to a third party in 1993. In 2001, the Company responded to an earlier request for information concerning milling activities stating that it was not responsible for any such activities at the Eureka Mills Site. The second request for information concerned historic mining activities. In responding to EPA's November 2008 letter and also to a recent third request for information received in March 2009, the Company stated that it does not believe it is liable for the company and the EPA to discuss this matter. The Company does not know the extent to which EPA may seek to hold the Company liable for cleanup or whether the Company would have claims against any other parties. The Company is continuing to evaluate this matter.

# Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

### Issuer Purchases of Equity Securities

The Company's Board of Directors has extended, until October 2010, its authorization to repurchase up to ten million shares of the Company's common stock through open market transactions or through privately negotiated transactions. The Company has no obligation to repurchase any shares and may cancel, suspend, or extend the time period for the repurchase of shares at any time. Any repurchases will be funded primarily through existing cash and cash from operations. The Company may hold any shares repurchased in treasury or use a portion of the repurchased shares for employee benefit plans, as well as for other corporate purposes. From its initial authorization in 1999 through September 26, 2009, the Company had repurchased approximately 2.4 million shares under this authorization. Below is a summary of the Company's stock repurchases for the period ended September 26, 2009.

-	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares That May Yet Be Purchased Under the <u>Plans or Programs</u> 7,647,030 (1)
June 28 – July 25, 2009	2,826 (2)	\$ 24.32	—	
July 26 – August 22, 2009	14,112 (2)	24.58	—	
August 23 – September 26, 2009		—		
Total	16,938	24.54		7,647,030

(1) Shares available to be purchased under the Company's 10 million share repurchase authorization until October 2010. The extension of the authorization was announced on October 21, 2009.

(2) Shares tendered to the Company by employee stock option holders in payment of the option purchase price and/or withholding taxes upon exercise.

#### Item 5. Other Matters

On September 30, 2009, a coalition of U.S. producers, including two wholly owned subsidiaries of the Company, Mueller Copper Tube Products, Inc. and Mueller Copper Tube Company, Inc., filed petitions with the DOC and the U.S. International Trade Commission seeking the imposition of antidumping duties on imports of seamless refined copper tube from China and Mexico. The Company believes that its sales have been harmed as a result of dumping of copper tube products by Chinese and Mexican competitors. The DOC is expected to decide whether to initiate antidumping investigations during October 2009.

#### Item 6. Exhibits

- 3.1 Amended and Restated Bylaws of the Registrant, adopted and effective as of July 30, 2009 (Incorporated herein by reference to Exhibit 3.1 of the Registrant's Current Report on Form 8-K dated, July 30, 2009).
- 19.1 Mueller Industries, Inc.'s Quarterly Report to Stockholders for the quarter ended September 26, 2009. Such report is being furnished for the information of the Securities and Exchange Commission only and is not to be deemed filed as part of this Quarterly Report on Form 10-Q.
- 31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

# Items 1A, 3, and 4 are not applicable and have been omitted.

# SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

# EXHIBIT INDEX

## Exhibits Description

- 19.1 Mueller Industries, Inc.'s Quarterly Report to Stockholders for the quarter ended September 26, 2009. Such report is being furnished for the information of the Securities and Exchange Commission only and is not to be deemed filed as part of this Quarterly Report on Form 10-Q.
- 31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

## TO OUR STOCKHOLDERS, CUSTOMERS, AND EMPLOYEES

For the three months ended September 26, 2009, Mueller's net income was \$18.7 million, or 50 cents per diluted share, on net sales of \$419.9 million. Year-to-date, the Company earned \$22.2 million, or 59 cents per diluted share. Net sales for the first nine months of 2009 were \$1.11 billion.

Net sales of the Company's core product lines including copper tube, fittings, brass rod and forgings were substantially affected by the lower market values of copper and brass, the Company's principal raw materials, which are largely passed through to customers. In the third quarter of 2009, the Comex average price of copper was 23 percent lower than in the third quarter of 2008. In addition, unit volumes of most of the Company's core product lines were well below year ago levels.

Our cost control initiatives have helped to mitigate the impact of weak demand in the residential and commercial construction sectors. We expect challenging market conditions will continue into next year.

Our Plumbing & Refrigeration segment posted operating earnings of \$16.0 million on net sales of \$240.9 million compared with operating earnings of \$25.4 million on net sales of \$371.3 million in the third quarter of 2008. Due to lower throughput volumes, we experienced higher per unit conversion costs. Our OEM segment posted operating earnings of \$16.5 million during the third quarter of 2009 on net sales of \$181.6 million, which compared with operating earnings of \$10.6 million on net sales of \$299.5 million for the same period in 2008.

We continue to generate cash by intensively managing working capital and monitoring capital expenditures. Mueller ended the quarter with \$353.9 million in cash, or \$9.40 per share. Our financial position remains strong.

1

Very Truly Yours,

<u>/S/ Harvey L. Karp</u> Harvey L. Karp Chairman of the Board

Statements in this release that are not strictly historical may be "forward-looking" statements, which involve risks and uncertainties. These include economic and currency conditions, continued availability of raw materials, market demand, pricing, and competitive and technological factors, among others, as set forth in the Company's SEC filings. These filings are available through our website at www.muellerindustries.com.

I, Gregory L. Christopher, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Mueller Industries, Inc.;
- Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
