

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C.

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2012

Commission file number 1-6770

MUELLER INDUSTRIES, INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction
of incorporation or organization)

25-0790410
(I.R.S. Employer
Identification No.)

8285 Tournament Drive, Suite 150
Memphis, Tennessee
(Address of principal executive offices)

38125
(Zip Code)

(901) 753-3200
(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer

Accelerated filer
Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the Registrant's common stock outstanding as of April 23, 2012, was 38,247,828.

MUELLER INDUSTRIES, INC.
FORM 10-Q
For the Quarterly Period Ended March 31, 2012

As used in this report, the terms “Company,” “Mueller,” and “Registrant” mean Mueller Industries, Inc. and its consolidated subsidiaries taken as a whole, unless the context indicates otherwise.

MUELLER INDUSTRIES, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

General

Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. Results of operations for the interim periods presented are not necessarily indicative of results which may be expected for any other interim period or for the year as a whole. This Quarterly Report on Form 10-Q should be read in conjunction with the Company's Annual Report on Form 10-K, including the annual financial statements incorporated therein.

The accompanying unaudited interim financial statements include all normal recurring adjustments which are, in the opinion of management, necessary to a fair statement of the results for the interim periods presented. The first quarter of 2012 was a 13-week quarter while the first quarter of 2011 was a 14-week quarter.

Note 1 – Earnings per Common Share

Basic per share amounts have been computed based on the average number of common shares outstanding. Diluted per share amounts reflect the increase in average common shares outstanding that would result from the assumed exercise of outstanding stock options and vesting of restricted stock awards, computed using the treasury stock method.

Note 2 – Commitments and Contingencies

The Company is involved in certain litigation as a result of claims that arose in the ordinary course of business, which management believes will not have a material adverse effect on the Company's financial position, results of operations, or cash flows. The Company may also realize the benefit of certain legal claims and litigation in the future; these gain contingencies are not recognized in the Condensed Consolidated Financial Statements.

Extruded Metals Class Action

A purported class action was filed in Michigan Circuit Court by Gaylord L. Miller, and all others similarly situated, against a subsidiary of the Company, Extruded Metals, Inc., in March 2012 under nuisance, negligence, and gross negligence theories. It is brought on behalf of all persons in the City of Belding, Michigan, whose property rights have allegedly been interfered with by fallout and/or dust and/or noxious odors, allegedly attributable to Extruded Metals' operations. Plaintiffs allege that they have suffered interference with the use and enjoyment of their properties. They seek compensatory and exemplary damages and injunctive relief. The Company intends to vigorously defend this matter. At this time, the Company is unable to determine the impact, if any, that this matter will have on its financial position, results of operations, or cash flows.

Supplier Litigation

On May 6, 2011, the Company and two of its subsidiaries, Mueller Streamline Co. (Mueller Streamline) and B&K Industries, Inc. (B&K)(Plaintiffs), filed a civil lawsuit in federal district court in Los Angeles, California against a former supplier, Xiamen Lota International Co., Ltd (Xiamen Lota), its U.S. sales representative (Lota USA), and certain other persons (Defendants). The lawsuit alleges, among other things, that the Defendants gave Peter D. Berkman, a former executive of the Company and B&K, an undisclosed interest in Lota USA, and made payments and promises of payments to him, in return for Peter Berkman maintaining the Company as a customer, increasing purchasing levels, and acquiescing to non-competitive and excessive pricing for Xiamen Lota products. The lawsuit alleges violations of federal statutes 18 U.S.C. Sections 1962(c) and (d) (RICO claims) and California state law unfair competition. The lawsuit seeks compensatory, treble and punitive damages, and other appropriate relief including an award of reasonable attorneys' fees and costs of suit. All of the foreign Defendants have been served under the Hague Convention and Xiamen Lota has withdrawn its motion contesting service of process (filed July 1, 2011). On January 4, 2012, the foreign Defendants filed a motion to dismiss all of the claims in the Company's Complaint for failure to state claims, and also joined in Lota USA's pending motion to dismiss (filed July 1, 2011). On December 16, 2011, the Court granted Lota USA's motion to disqualify the Company's counsel and the Company has retained new counsel to represent it going forward in the lawsuit. The motions to dismiss were heard on April 9, 2012, and the Court sustained Plaintiffs' unfair competition claim, and dismissed without prejudice and with leave to amend, their RICO claims. The Plaintiffs intend to file an amended Complaint. The Court also set a trial date for this civil matter to commence on April 16, 2013.

Other

Guarantees, in the form of letters of credit, are issued by the Company generally to assure the payment of insurance deductibles and certain retiree health benefits. The terms of the Company's guarantees are generally one year but are renewable annually as required. These letters are primarily backed by the Company's line of credit facility. The maximum payments that the Company could be required to make under its guarantees at March 31, 2012 was \$11.7 million.

Note 3 – Insurance Claims*Fulton, Mississippi, Copper Tube Facility*

In July 2009, there was an explosion at the Company's copper tube facility in Fulton, Mississippi resulting in damage to certain production equipment. In the first quarter of 2012, the Company settled the business interruption portion of this claim and recognized a \$1.5 million gain.

Wynne, Arkansas, Copper Tube Facility

In September 2011, a portion of the Company's Wynne, Arkansas, manufacturing operation was damaged by fire. Certain inventories, production equipment, and building structures were extensively damaged. The total value of the loss, including business interruption, cannot be determined at this time, but is expected to be covered by property and business interruption insurance subject to customary deductibles. Any gain resulting from insurance proceeds for property damage in excess of the net book value of the related property will be recognized in income upon settlement of the claim. In addition, the Company has deferred recognition of direct, identifiable costs associated with this matter. These costs will also be recognized upon settlement of the insurance claim. As of March 31, 2012, the Company has received advances totaling \$50 million from the insurance company for this claim, of which \$40 million was received during the first quarter of 2012. These advances, net of the book value of damaged inventories, equipment, and buildings and direct clean-up and other out of pocket costs totaled \$33.1 million, classified as other current liabilities on the Condensed Consolidated Balance Sheet at March 31, 2012.

Note 4 – Inventories

<i>(In thousands)</i>	<u>March 31, 2012</u>	<u>December 31, 2011</u>
Raw materials and supplies	\$ 43,349	\$ 42,281
Work-in-process	31,915	38,420
Finished goods	166,452	143,648
Valuation reserves	<u>(5,406)</u>	<u>(5,156)</u>
Inventories	<u>\$ 236,310</u>	<u>\$ 219,193</u>

The Company has partially liquidated inventories valued using the last-in, first-out (LIFO) method during the first quarter of 2012. The Company expects to replenish these inventories by the end of 2012 and, as such, has not recognized the effects of liquidating LIFO layers. In the event these inventories are not replenished, due to lack of availability or operational reasons, the Company would recognize a reduction to cost of goods sold of approximately \$19.5 million from the liquidation of LIFO layers based on quarter-end quantities.

During 2011, inventory quantities valued using the LIFO method declined which resulted in liquidation of LIFO inventory layers. This liquidation resulted from intercompany sales; therefore, the gain from the LIFO liquidation of approximately \$8.0 million was deferred. During the first quarter of 2012, the Company sold this inventory to third parties and recognized the gain. This recognition resulted in a reduction of approximately \$8.0 million to cost of sales, or \$0.13 per diluted share after tax.

Note 5 – Industry Segments

The Company's reportable segments are Plumbing & Refrigeration and Original Equipment Manufacturers (OEM). For disclosure purposes, as permitted under Accounting Standards Codification (ASC) 280, *Segment Reporting*, certain operating segments are aggregated into reportable segments. The Plumbing & Refrigeration segment is composed of Standard Products (SPD), European Operations, and Mexican Operations. The OEM segment is composed of Industrial Products (IPD), Engineered Products (EPD), and Jiangsu Mueller-Xingrong Copper Industries Limited (Mueller-Xingrong). These segments are classified primarily by the markets for their products. Performance of segments is generally evaluated by their operating income. Intersegment transactions are generally conducted on an arms-length basis.

SPD manufactures copper tube and fittings, plastic fittings, plastic pipe, and line sets. These products are manufactured in the U.S. Outside the U.S., the Company's European Operations manufacture copper tube, which is sold in Europe and the Middle East. SPD also imports and resells brass and plastic plumbing valves, malleable iron fittings, faucets, and plumbing specialty products. Mexican Operations consist of pipe nipple manufacturing and import distribution businesses including product lines of malleable iron fittings and other plumbing specialties. The European Operations consist of copper tube manufacturing and the import distribution of fittings, valves, and plumbing specialties primarily in the U.K. and Ireland. The Plumbing & Refrigeration segment's products are sold primarily to plumbing, refrigeration, and air-conditioning wholesalers, hardware wholesalers and co-ops, and building product retailers.

IPD manufactures brass rod, impact extrusions, and forgings which are used in a wide variety of end products including plumbing brass, automotive components, valves, and fittings. EPD manufactures and fabricates valves and assemblies primarily for the refrigeration, air-conditioning, and gas appliance markets and specialty copper, copper-alloy, and aluminum tubing. Mueller-Xingrong manufactures engineered copper tube primarily for air-conditioning applications. These products are sold primarily to OEM customers.

Summarized segment information is as follows:

<i>(In thousands)</i>	For the Quarter Ended March 31, 2012			
	Plumbing & Refrigeration Segment	OEM Segment	Corporate and Eliminations	Total
Net sales	\$ 315,354	\$ 270,976	\$ (8,662)	\$ 577,668

Note 6 – Employee Benefits

The Company sponsors several qualified and nonqualified pension plans and other postretirement benefit plans for certain of its employees. The components of net periodic benefit cost are as follows:

<i>(In thousands)</i>	For the Quarter Ended	
	March 31, 2012	April 2, 2011
Pension benefits:		
Service cost	\$ 360	\$ 254
Interest cost	2,219	2,155
Expected return on plan assets	(2,713)	(2,652)
Amortization of net loss	943	574
Net periodic benefit cost	<u>\$ 809</u>	<u>\$ 331</u>
Other benefits:		
Service cost	\$ 75	\$ 69
Interest cost	309	318
Amortization of prior service cost	—	1
Amortization of net loss	3	25
Net periodic benefit cost	<u>\$ 387</u>	<u>\$ 413</u>

Note 7 – Income Taxes

The Company's effective tax rate for the first quarter of 2012 was 26 percent compared with 33 percent for the same period last year. For the first quarter of 2012, the difference between the effective tax rate and the U.S. federal statutory tax rate relate primarily to: (i) the U.S. production activities deduction of \$1.2 million; (ii) decreases in tax contingencies of \$0.9 million; (iii) decreases in valuation allowances of \$0.8 million; and (iv) the effect of foreign tax rates lower than statutory tax rates and other foreign adjustments of \$2.6 million. These items were partially offset by the provision for state income taxes, net of the federal benefit, of \$1.3 million.

[Table of Contents](#)

Due to ongoing federal and state income tax audits and potential lapses of the statutes of limitations in various taxing jurisdictions, it is reasonably possible that unrecognized tax benefits may decrease in the next twelve months by up to \$1.0 million. Total unrecognized tax benefits including derecognized deferred tax assets at the end of the first quarter were \$3.9 million, without consideration of any applicable federal benefit, including \$0.3 million of accrued interest and penalties. Of the \$3.9 million, up to \$1.1 million could impact the effective tax rate, if recognized.

The Company files a consolidated U.S. federal income tax return and numerous consolidated and separate-company income tax returns in many state, local, and foreign jurisdictions. The statutes of limitations are open for the Company's federal tax return and most state income tax returns for 2008 and all subsequent years. The Internal Revenue Service has notified the Company that it plans to examine the Company's 2009 and 2010 consolidated U.S. federal income tax returns. The statutes of limitations for certain state and foreign returns are open for earlier tax years due to ongoing audits and differing statute periods. While the Company believes that it is adequately reserved for possible future audit adjustments, the final resolution of these examinations cannot be determined with certainty and could result in final settlements that differ from current estimates.

Note 8 – Derivative Instruments and Hedging Activities

Copper and brass represent the largest component of the Company's variable costs of production. The cost of these materials is subject to global market fluctuations caused by factors beyond the Company's control. The Company occasionally enters into forward fixed-price arrangements with certain customers; the risk of these arrangements is generally managed with commodity futures contracts. The Company accounts for these futures contracts in accordance with ASC 815, *Derivatives and Hedging* (ASC 815). These futures contracts have been designated as cash flow hedges. The fair value of open futures contracts is recognized as a component of accumulated other comprehensive income until the position which corresponds to the period when the related hedged transaction is recognized in earnings. Should these contracts no longer meet hedge criteria in accordance with ASC 815, either through lack of effectiveness or because the hedged transaction is no longer probable of occurring, all deferred gains and losses related to the hedge would be immediately reclassified from accumulated other comprehensive income into earnings. In the next twelve months, the Company will reclassify into earnings realized gains or losses of cash flow hedges; at March 31, 2012, the net fair value of these contracts was an \$803 thousand gain position.

At March 31, 2012, the Company held open futures contracts to purchase approximately \$25.6 million of copper over the next 21 months related to fixed price sales orders. The fair value of those futures contracts was a \$787 thousand gain position, which was determined by obtaining quoted market prices (Level 1 hierarchy as defined by ASC 820, *Fair Value Measurements and Disclosures* (ASC 820)).

Derivative instruments designated as cash flow hedges under ASC 815 are reflected in the Condensed Consolidated Financial Statements as follows:

<i>(In thousands)</i>	March 31, 2012		Fair value
	Location		
Commodity contracts	Other current assets:	Gain positions	\$ 961
		Loss positions	(170)
	Other current liabilities:	Gain positions	12
		Loss positions	(16)
December 31, 2011			
<i>(In thousands)</i>	Location		Fair value
Commodity contracts	Other current assets:	Gain positions	\$ 85
		Loss positions	(25)
	Other current liabilities:	Gain positions	339
		Loss positions	(1,078)

[Table of Contents](#)

The following tables summarize activities related to the Company's derivative instruments, classified as cash flow hedges in accordance with ASC 815:

(In thousands)	Gain (Loss) Recognized in Accumulated OCI (Effective Portion), Net of Tax	
	For the Quarter Ended	
	March 31, 2012	April 2, 2011
Commodity contracts	\$ 1,287	\$ (168)

(In thousands)	(Gain) Loss Reclassified from Accumulated OCI into Income (Effective Portion), Net of Tax	
	For the Quarter Ended	
	March 31, 2012	April 2, 2011
Commodity contracts:		
Cost of goods sold	\$ (374)	\$ (609)

The Company enters into futures contracts that closely match the terms of the underlying transactions. As a result, the ineffective portion of the open hedge contracts through March 31, 2012 was not material to the Condensed Consolidated Statements of Income.

The Company does not offset fair value of amounts for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral. At March 31, 2012, the Company had recorded restricted cash of \$217 thousand related to open futures contracts.

Note 9 – Recently Issued Accounting Standards

In January 2012, the Company adopted Accounting Standard Update No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which requires presentation of the components of net income and other comprehensive income either as one continuous statement or as two consecutive statements and eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. The standard does not change the items that must be reported in other comprehensive income, how such items are measured or when they must be reclassified to net income.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General Overview

The Company is a leading manufacturer of copper, brass, plastic, and aluminum products. The range of these products is broad: copper tube and fittings; brass and copper alloy rod, bar, and shapes; aluminum and brass forgings; aluminum and copper impact extrusions; plastic pipe, fittings and valves; refrigeration valves and fittings; fabricated tubular products; and steel nipples. The Company also resells imported brass and plastic plumbing valves, malleable iron fittings, faucets and plumbing specialty products. Mueller's operations are located throughout the United States and in Canada, Mexico, Great Britain, and China.

[Table of Contents](#)

The Company's businesses are aggregated into two reportable segments: the Plumbing & Refrigeration segment and the Original Equipment Manufacturers (OEM) segment. For disclosure purposes, as permitted under ASC 280, *Segment Reporting*, certain operating segments are aggregated into reportable segments. The Plumbing & Refrigeration segment is composed of the Standard Products Division (SPD), European Operations, and Mexican Operations. The OEM segment is composed of the Industrial Products Division (IPD), Engineered Products Division (EPD), and Mueller-Xingrong. Certain administrative expenses and expenses related primarily to retiree benefits at inactive operations are combined into the Corporate and Eliminations classification. These reportable segments are described in more detail below.

SPD manufactures and sells copper tube, copper and plastic fittings, line sets, plastic pipe, and valves in North America and sources products for import distribution in North America. European Operations manufacture copper tube in Europe, which is sold in Europe and the Middle East; activities also include import distribution in the U.K. and Ireland. Mexican Operations consist of pipe nipple manufacturing and import distribution businesses including product lines of malleable iron fittings and other plumbing specialties. The Plumbing & Refrigeration segment sells products to wholesalers in the HVAC (heating, ventilation, and air-conditioning), plumbing, and refrigeration markets, to distributors to the manufactured housing and recreational vehicle industries, and to building material retailers.

The OEM segment manufactures and sells brass and copper alloy rod, bar, and shapes; aluminum and brass forgings; aluminum and copper impact extrusions; refrigeration valves and fittings; fabricated tubular products; and gas valves and assemblies. Mueller-Xingrong manufactures engineered copper tube primarily for air-conditioning applications; these products are sold primarily to OEM's located in China. The OEM segment sells its products primarily to original equipment manufacturers, many of which are in the HVAC, plumbing, and refrigeration markets.

New housing starts and commercial construction are important determinants of the Company's sales to the HVAC, refrigeration, and plumbing markets because the principal end use of a significant portion of the Company's products is in the construction of single and multi-family housing and commercial buildings. Repairs and remodeling projects are also important drivers of underlying demand for these products.

The majority of the Company's manufacturing facilities operated at significantly below capacity during 2011 and the first quarter of 2012 due to reduced demand for the Company's products arising from the general economic conditions in the U.S. and foreign markets that the Company serves. The U.S. housing and residential construction market has not recovered from the recent economic downturn. The recent years from 2009 through 2011 had the lowest recorded housing starts since recordkeeping began in 1959. From 1959 through 2007, annual housing starts averaged over 1.5 million units. Per the U.S. Census Bureau, actual housing starts in the U.S. were 150 thousand for the first quarter of 2012, up from 126 thousand for the first quarter of 2011. The March 2012 seasonally adjusted annual rate of new housing starts was 654 thousand, which is an increase of 10.3 percent compared with the March 2011 rate of 593 thousand. Mortgage rates have remained at low levels during 2012 and 2011, as the average 30-year fixed mortgage rate was 3.92 percent for the first three months of 2012 and 4.45 percent for the twelve months ended December 2011. Commercial construction has also remained at low levels. According to the U.S. Census Bureau, the seasonally adjusted annual value of private nonresidential construction put in place was \$280.8 billion in February 2012, significantly less than the activity levels during 2007 and 2008. Business conditions in the U.S. automotive industry were also exceptionally difficult in the economic downturn during 2008 and 2009, which affected the demand for various products in the Company's OEM segment; however, some improvements have recently occurred. These conditions have significantly affected the demand for virtually all of the Company's core products in recent years.

Residential construction activity is still at historical lows and recovery in the near-term is expected to be modest due to continuing high rates of unemployment, the impact of mounting foreclosures, and tighter lending standards. The private non-residential construction sector, which includes offices, industrial and retail projects, showed slight improvement in 2011 after declines of almost 25 percent in 2010 and 13 percent in 2009. The Company expects that most of the conditions will gradually improve during 2012.

Profitability of certain of the Company's product lines depends upon the "spreads" between the cost of raw material and the selling prices of its products. The open market prices for copper cathode and scrap, for example, influence the selling price of copper tube, a principal product manufactured by the Company. The Company attempts to minimize the effects on profitability from fluctuations in material costs by passing through these costs to its customers. The Company's earnings and cash flow are dependent upon these spreads that fluctuate based upon market conditions.

[Table of Contents](#)

Earnings and profitability are also impacted by unit volumes that are subject to market trends, such as substitute products, imports, technologies, and market share. In core product lines, the Company intensively manages its pricing structure while attempting to maximize its profitability. From time-to-time, this practice results in lost sales opportunities and lower volume. For plumbing systems, plastics are the primary substitute product; these products represent an increasing share of consumption. U.S. consumption of copper tube is still predominantly supplied by U.S. manufacturers. For certain air-conditioning and refrigeration applications, aluminum based systems are the primary substitution threat. The Company cannot predict the acceptance or the rate of switching that may occur. In recent years, brass rod consumption in the U.S. has declined due to the outsourcing of many manufactured products from offshore regions.

Results of Operations

During the first quarter of 2012, the Company's net sales were \$577.7 million, which compares with net sales of \$687.7 million over the same period of 2011. The decrease was primarily attributable to lower unit sales volume in most of the Company's primary product lines and the decrease in base metal prices, primarily copper. The first quarter of 2012 was a 13-week quarter while the first quarter of 2011 was a 14-week quarter, which also contributed to lower sales. Net selling prices generally fluctuate with changes in raw material costs. Changes in raw material costs are generally passed through to customers by adjustments to selling prices. The Comex average copper price in the first quarter of 2012 was approximately \$3.78 per pound, or 14 percent less than the first quarter of 2011 average of \$4.39 per pound.

Cost of goods sold was \$493.2 million in the first quarter of 2012 compared with \$589.9 million in the same period of 2011. Consistent with the factors noted above regarding net sales, the year-over-year decrease was due primarily to decreased sales volume in core product lines and the decrease in the price of copper, the Company's principal raw material. In addition, the Company recognized a gain from LIFO liquidation that resulted in a reduction of approximately \$8.0 million to cost of sales, or \$0.13 per diluted share after tax.

Depreciation and amortization declined from \$9.7 million in 2011 to \$7.5 million in 2012. The reduction is due to certain assets becoming fully depreciated. Selling, general, and administrative expenses decreased to \$31.6 million in the first quarter of 2012; this \$3.8 million decrease was primarily due to decreased salary and bonus expenses, a decrease in legal fees in relation to certain claims being settled in 2011, and a decrease in bad debt expense. During the first quarter of 2012, the Company settled the business interruption portion of its claim related to the July 2009 explosion at the copper tube facility in Fulton, Mississippi and recognized a \$1.5 million gain. During the first quarter of 2011, the Company recorded a gain of \$10.5 million upon receipt of payment related to the December 10, 2010 settlement of a lawsuit against Peter D. Berkman, Jeffrey A. Berkman, and Homewerks Worldwide LLC.

Interest expense decreased to \$2.6 million in the first quarter of 2012 from \$3.3 million for the same period in 2011. This decrease was primarily related to Mueller Xingrong. Other income, net was \$0.3 million in the first quarter of 2012 compared with income of \$1.1 million for the same period in 2011. This fluctuation was primarily due to a decrease in environmental expense.

The Company's effective tax rate for the first quarter of 2012 was 26 percent compared with 33 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the first quarter of 2012 were: (i) the U.S. production activities deduction of \$1.2 million; (ii) decreases in tax contingencies of \$0.9 million; (iii) decreases in valuation allowances of \$0.8 million; and (iv) the effect of foreign tax rates lower than statutory tax rates and other foreign adjustments of \$2.6 million. These items were partially offset by the provision for state income taxes, net of the federal benefit, of \$1.3 million.

Plumbing & Refrigeration Segment

First quarter net sales by the Plumbing & Refrigeration segment decreased 17 percent to \$315.4 million in 2012 from \$380.6 million in 2011. This decrease was due to lower unit sales volume resulting from decreased demand in the majority of the segment's core product lines and from lower selling prices resulting from lower average prices of raw materials. Of the \$65.2 million decrease in net sales, approximately \$30.6 million was attributable to lower unit volume and approximately \$31.3 million was due to lower net selling prices in the segment's core product lines consisting primarily of copper tube, line sets, and fittings. Cost of goods sold decreased from \$323.2 million in the first quarter of 2011 to \$265.5 million in the same period of 2012, which was also due to lower sales volume and decreasing raw material prices, primarily copper. Depreciation and amortization in the first quarter decreased from \$5.8 million in 2011 to \$4.1 million in 2012 resulting from certain assets being fully depreciated. Selling, general, and administrative expenses decreased from \$21.9 million in the first quarter of 2011 to \$19.0 million in the first quarter of 2012. The decrease is primarily due to employment costs as there were 14 weeks in the first quarter of 2011 and only 13 weeks in the first quarter of 2012. Operating income for the segment decreased to \$28.3 million in the first quarter of 2012 from \$29.7 million in the first quarter of 2011. This decrease was due to (i) lower sales volume in the segment's core product lines, (ii) decreased spreads in core products (especially in copper tube), and (iii) higher per unit conversion costs in a majority of the segment's product lines resulting primarily from decreased production activities. The decrease in operating income was partially offset by the recognition of an \$8.0 million LIFO gain and the \$1.5 million insurance settlement.

OEM Segment

The OEM segment's first quarter net sales were \$271.0 million in 2012 compared with \$319.3 million in 2011. The decrease was due primarily to lower sales volume and lower net selling prices resulting from lower average costs of raw materials. Of the \$48.3 million decrease in net sales, approximately \$28.2 million was attributable to lower sales volume and approximately \$11.5 million was due to lower net selling prices in the segment's core product lines of brass rod, forgings, impacts, and commercial tube. Cost of goods sold decreased to \$236.2 million in the first quarter of 2012 from \$278.8 million in the same period of 2011, which was also due to the decrease in sales volume and average costs of raw materials. Depreciation and amortization decreased slightly from \$3.6 million to \$3.1 million resulting from certain assets being fully depreciated. First quarter selling, general, and administrative expenses were \$7.0 million in 2012, consistent with the same period in 2011. Operating income decreased from \$29.6 million in the first quarter of 2011 to \$24.7 million in the same period of 2012, due primarily to lower sales volume, decreased unit spreads, and higher per unit conversion costs in certain product lines.

Liquidity and Capital Resources

Cash used in operating activities during the three months ended March 31, 2012 totaled \$10.8 million, which was primarily attributable to increased receivables of \$67.0 million and increased inventories of \$13.7 million, partially offset by net income of \$32.8 million plus depreciation and amortization of \$7.6 million, \$24.7 million increase in current liabilities, and insurance proceeds of \$9.0 million. The increases in receivables, inventories, and current liabilities primarily resulted from the increased cost of raw materials in certain businesses during the first quarter of 2012. Fluctuations in the cost of copper and other raw materials affect the Company's liquidity. Changes in material costs directly impact components of working capital, primarily inventories and accounts receivable. During the first three months of 2012, the average Comex copper price was approximately \$3.78 per pound, which represents an 11 percent increase over the average price during the fourth quarter of 2011. This increase in the price of cathode has also resulted in increases in the open market price for copper scrap and, to a lesser extent, the price of brass scrap.

[Table of Contents](#)

During the first three months of 2012, cash provided by investing activities totaled \$25.4 million. The major components of net cash provided by investing activities included insurance proceeds of \$32.5 million, partially offset by \$9.3 million used for capital expenditures.

Net cash used in financing activities totaled \$3.1 million, which consists primarily of \$3.8 million used for payment of regular quarterly dividends to stockholders of the Company, partially offset by \$0.9 million received from the issuance of debt by Mueller-Xingrong.

The Company has significant environmental remediation obligations. The performance of these obligations is expected to occur over a minimum of 20 years. Cash used for environmental remediation activities was approximately \$0.2 million during the first quarter of 2012. The Company expects to spend approximately \$0.8 million for the remainder of 2012 for ongoing environmental remediation activities. The timing of a potential payment for a \$9.5 million settlement offer has not yet been determined.

The Company's Credit Agreement provides for an unsecured \$350 million revolving line of credit (the Credit Facility) maturing on March 7, 2016. The Credit Facility backed approximately \$11.7 million in letters of credit at the end of the quarter. As of March 31, 2012, the Company's total debt was \$198.8 million or 17.7 percent of its total capitalization.

Covenants contained in the Company's financing obligations require, among other things, the maintenance of minimum levels of tangible net worth and the satisfaction of certain minimum financial ratios. As of March 31, 2012, the Company was in compliance with all of its debt covenants.

The Company declared and paid a regular quarterly cash dividend of ten cents per common share in the first quarter of 2012. Payment of dividends in the future is dependent upon the Company's financial condition, cash flows, capital requirements, earnings, and other factors. On May 1, 2012, the Company will pay approximately \$4.4 million in interest on the Debentures that remain outstanding.

Management believes that the Credit Facility, cash generated by operations, and currently available cash of \$526.9 million will be adequate to meet the Company's normal future capital expenditures and operational needs. The Company's current ratio was 4.1 to 1 at March 31, 2012.

The Company's Board of Directors has extended, until October 2012, its authorization to repurchase up to ten million shares of the Company's common stock through open market transactions or through privately negotiated transactions. The Company has no obligation to repurchase any shares and may cancel, suspend, or extend the time period for the repurchase of shares at any time. Any repurchases will be funded primarily through existing cash and cash from operations. The Company may hold any shares repurchased in treasury or use a portion of the repurchased shares for employee benefit plans, as well as for other corporate purposes. From its initial authorization in 1999 through March 31, 2012, the Company had repurchased approximately 2.4 million shares under this authorization. In addition, the Company may repurchase portions of its 6% Subordinated Debentures through open market transactions or through privately negotiated transactions.

There have been no significant changes in the Company's contractual cash obligations reported at December 31, 2011.

Non-GAAP Measurements

Earnings without the LIFO gain and insurance settlement in 2012 and without the litigation settlement in 2011 is a measurement not derived in accordance with generally accepted accounting principles (GAAP). Excluding the LIFO gain, insurance settlement, and litigation settlement is useful as it measures the operating results that are the outcome of daily operating decisions made in the normal course of business. The LIFO gain resulted from deferred recognition of the 2011 decrement and the insurance settlement was related to a 2009 claim at the Company's Fulton, Mississippi, copper tube mill. The litigation settlement resulted from the collection of proceeds from the lawsuit against Peter Berkman, Jeffrey Berkman, and Homewerks Worldwide LLC, the results of which are not impacted by daily operations. Reconciliations of earnings without the LIFO gain, insurance settlement, and litigation settlement to net income as reported are as follows:

<i>(In thousands, except per share data)</i>	For the Quarter Ended March 31, 2012			
	As Reported	Impact of LIFO Gain	Impact of Insurance Settlement	Pro forma
Operating income	\$ 46,862	\$ (7,979)	\$ (1,500)	\$ 37,383

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to market risk from changes in raw material and energy costs, interest rates, and foreign currency exchange rates. To reduce such risks, the Company may periodically use financial instruments. All hedging transactions are authorized and executed pursuant to policies and procedures. Further, the Company does not buy or sell financial instruments for trading purposes.

Cost and Availability of Raw Materials and Energy

Copper and brass represent the largest component of the Company's variable costs of production. The cost of these materials is subject to global market fluctuations caused by factors beyond the Company's control. Significant increases in the cost of metal, to the extent not reflected in prices for the Company's finished products, or the lack of availability could materially and adversely affect the Company's business, results of operations, and financial condition.

The Company occasionally enters into forward fixed-price arrangements with certain customers. The Company may utilize futures contracts to hedge risks associated with these fixed-price arrangements. The Company may also utilize futures contracts to manage price risk associated with inventory. Depending on the nature of the hedge, changes in the fair value of the futures contracts will either be offset against the change in fair value of the inventory through earnings or recognized as a component of accumulated other comprehensive income and reflected in earnings upon the sale of inventory. Periodic value fluctuations of the contracts generally offset the value fluctuations of the underlying fixed-price transactions or inventory. At March 31, 2012, the Company held open futures contracts to purchase approximately \$25.6 million of copper over the next 21 months related to fixed-price sales orders.

Futures contracts may also be used to manage price risk associated with natural gas purchases. The effective portion of gains and losses with respect to these positions are deferred in stockholders' equity as a component of accumulated other comprehensive income and reflected in earnings upon consumption of natural gas. Periodic value fluctuations of the contracts generally offset the value fluctuations of the underlying natural gas prices. At March 31, 2012, the Company held no open futures contracts to purchase natural gas.

Interest Rates

At March 31, 2012, the Company had variable-rate debt outstanding of \$50.6 million, the majority of which related to the debt issued by Mueller-Xingrong. At these borrowing levels, a hypothetical 10 percent increase in interest rates would have had an insignificant unfavorable impact on the Company's pretax earnings and cash flows. The primary interest rate exposure on floating-rate debt is based on LIBOR and on the base-lending rate published by the People's Bank of China.

Foreign Currency Exchange Rates

Foreign currency exposures arising from transactions include firm commitments and anticipated transactions denominated in a currency other than an entity's functional currency. The Company and its subsidiaries generally enter into transactions denominated in their respective functional currencies. Foreign currency exposures arising from transactions denominated in currencies other than the functional currency are generally not material; however, the Company may utilize certain futures or forward contracts to hedge such transactional exposures. Gains and losses with respect to these positions are deferred in stockholders' equity as a component of comprehensive income and reflected in earnings upon collection of receivables. At March 31, 2012, the Company had open futures contracts with a financial institution to sell approximately 2.4 million Canadian dollars and 0.7 million euros through June 2012.

The Company's primary foreign currency exposure arises from foreign-denominated revenues and profits and their translation into U.S. dollars. The primary currencies to which the Company is exposed include the Canadian dollar, the British pound sterling, the euro, the Mexican peso, and the Chinese renminbi. The Company generally views as long-term its investments in foreign subsidiaries with a functional currency other than the U.S. dollar. As a result, the Company generally does not hedge these net investments.

Cautionary Statement Regarding Forward Looking Information

Statements in this Quarterly Report on Form 10-Q that are not strictly historical may be "forward-looking" statements, which involve risks and uncertainties. These include economic and currency conditions, continued availability of raw materials and energy, market demand, pricing, competitive and technological factors, and the availability of financing, among others, as set forth in the Company's filings with the Securities and Exchange Commission (SEC). The words "outlook," "estimate," "project," "intend," "expect," "believe," "target," and similar expressions are intended to identify forward-looking statements. The reader should not place undue reliance on forward-looking statements, which speak only as of the date of this report. The Company has no obligation to publicly update or revise any forward-looking statements to reflect events after the date of this report.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures designed to ensure information required to be disclosed in Company reports filed under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures pursuant to Rule 13a-15(e) of the Exchange Act as of March 31, 2012. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective as of March 31, 2012 to ensure that information required to be disclosed in Company reports filed under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and (ii) accumulated and communicated to management, including the Company's principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the Company's fiscal quarter ending March 31, 2012, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

General

The Company is involved in certain litigation as a result of claims that arose in the ordinary course of business. Additionally, the Company may realize the benefit of certain legal claims and litigation in the future; these gain contingencies are not recognized in the Condensed Consolidated Financial Statements.

Extruded Metals Class Action

A purported class action was filed in Michigan Circuit Court by Gaylord L. Miller, and all others similarly situated, against a subsidiary of the Company, Extruded Metals, Inc., in March 2012 under nuisance, negligence, and gross negligence theories. It is brought on behalf of all persons in the City of Belding, Michigan, whose property rights have allegedly been interfered with by fallout and/or dust and/or noxious odors, allegedly attributable to Extruded Metals' operations. Plaintiffs allege that they have suffered interference with the use and enjoyment of their properties. They seek compensatory and exemplary damages and injunctive relief. The Company intends to vigorously defend this matter. At this time, the Company is unable to determine the impact, if any, that this matter will have on its financial position, results of operations, or cash flows.

Supplier Litigation

On May 6, 2011, the Company and two of its subsidiaries, Mueller Streamline Co. (Mueller Streamline) and B&K Industries, Inc. (B&K)(Plaintiffs), filed a civil lawsuit in federal district court in Los Angeles, California against a former supplier, Xiamen Lota International Co., Ltd (Xiamen Lota), its U.S. sales representative (Lota USA), and certain other persons (Defendants). The lawsuit alleges, among other things, that the Defendants gave Peter D. Berkman, a former executive of the Company and B&K, an undisclosed interest in Lota USA, and made payments and promises of payments to him, in return for Peter Berkman maintaining the Company as a customer, increasing purchasing levels, and acquiescing to non-competitive and excessive pricing for Xiamen Lota products. The lawsuit alleges violations of federal statutes 18 U.S.C. Sections 1962(c) and (d) (RICO claims) and California state law unfair competition. The lawsuit seeks compensatory, treble and punitive damages, and other appropriate relief including an award of reasonable attorneys' fees and costs of suit. All of the foreign Defendants have been served under the Hague Convention and Xiamen Lota has withdrawn its motion contesting service of process (filed July 1, 2011). On January 4, 2012, the foreign Defendants filed a motion to dismiss all of the claims in the Company's Complaint for failure to state claims, and also joined in Lota USA's pending motion to dismiss (filed July 1, 2011). On December 16, 2011, the Court granted Lota USA's motion to disqualify the Company's counsel and the Company has retained new counsel to represent it going forward in the lawsuit. The motions to dismiss were heard on April 9, 2012, and the Court sustained Plaintiffs' unfair competition claim, and dismissed without prejudice and with leave to amend, their RICO claims. Plaintiffs intend to file an amended Complaint. The Court also set a trial date for this civil matter to commence on April 16, 2013.

Environmental Matters

Operating properties:

Belding, Michigan Lead Matters

In October 2010, the MDEQ conducted testing of lead levels in soils on properties upwind and downwind of the Belding Facility. Results of that testing showed exceedances of the Michigan generic residential direct contact cleanup criteria for lead on a number of the downwind properties. Extruded has investigated the extent of this condition and performed remediation to the extent required by environmental laws and in accordance with a plan approved by the MDEQ in April 2011. In January 2012, Extruded submitted a final No Further Action Report to the MDEQ documenting its completion of that remediation. The Company provided \$0.4 million in 2010 for this matter, and is pursuing potential remedies from the previous owner. The Company does not expect additional material losses associated with these environmental matters. On April 4, 2012, the MDEQ approved the No Further Action Report.

Non-Operating properties:

East Chicago, Indiana USS Lead Superfund site

By letter dated April 17, 2012, EPA Region V indicated that it has tentatively decided to propose a remedy under the Comprehensive Environmental Response Compensation and Liability Act (also known as "Superfund") involving removal of soils contaminated by lead and arsenic at approximately 680 residential properties near a site that was formerly operated by USS Lead, a Mueller subsidiary. The proposed remedy was estimated to cost \$43.9 million. EPA has also notified two other "potentially responsible parties" (PRPs) at the site. The proposed remedy is subject to further review and consideration, as well as public comment, before it becomes final. No demand for funding has been received from EPA. By letter dated July 26, 2006, EPA acknowledged that "USS Lead itself appears to have limited financial ability to complete ... remediation-related activities" at the site, but stated that "[q]uestions remain, however, regarding the financial ability of USS Lead's corporate parent(s) to fund such activities." Mueller is currently unable to predict whether either USS Lead or Mueller itself might incur liability related to this site, or to estimate the extent of such liability or whether it would be material.

Item 1A. Risk Factors

The Company is exposed to risk as it operates its businesses. To provide a framework to understand the operating environment of the Company, we have provided a brief explanation of the more significant risks associated with our businesses in our 2011 Annual Report on Form 10-K. There have been no material changes in risk factors that were previously disclosed in our 2011 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The Company's Board of Directors has extended, until October 2012, its authorization to repurchase up to ten million shares of the Company's common stock through open market transactions or through privately negotiated transactions. The Company has no obligation to repurchase any shares and may cancel, suspend, or extend the time period for the repurchase of shares at any time. Any repurchases will be funded primarily through existing cash and cash from operations. The Company may hold any shares repurchased in treasury or use a portion of the repurchased shares for employee benefit plans, as well as for other corporate purposes. From its initial authorization in 1999 through March 31, 2012, the Company had repurchased approximately 2.4 million shares under this authorization. Below is a summary of the Company's stock repurchases for the period ended March 31, 2012.

	(a)	(b)	(c)	(d)
	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs
				7,647,030 (1)
January 1 – January 28, 2012	2,974 (2)	\$ 43.43	—

CERTIFICATION

I, Gregory L. Christopher, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Mueller Industries, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO SECTION 906
OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Mueller Industries, Inc. (the "Company") on Form 10-Q for the period ending March 31, 2012 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Gregory L. Christopher, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
