MUELLER INDUSTRIES, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

General

Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. Results of operations for the interim periods presented are not necessarily indicative of results which may be expected for any other interim period or for the year as a whole. This Quarterly Report on Form 10–Q should be read in conjunction with the Company's Annual Report on Form 10–K, including the annual financial statements incorporated therein.

The accompanying unaudited interim financial statements include all normal recurring adjustments which are, in the opinion of management, necessary to a fair statement of the results for the interim periods presented.

Note 1 - Earnings per Common Share

Basic per share amounts have been computed based on the average number of common shares outstanding. Diluted per share amounts reflect the increase in average common shares outstanding that would result from the assumed exercise of outstanding stock options, computed using the treasury stock method. Approximately 1.2 million stock options were excluded from the computation of diluted earnings per share for the three-month and six-month periods ended June 27, 2009, since the options' exercise price was higher than the average market price of the Company's stock.

Note 2 - Commitments and Contingencies

The Company is involved in certain litigation as a result of claims that arose in the ordinary course of business, which management believes will not have a material adverse effect on the Company's financial position or results of operations. During the second quarter of 2009, the Company recorded a provision of \$2.2 million, or 4 cents per diluted share after tax, as a result of additional loss contingencies that management deemed to become probable and estimable during the period. The Company may also realize the benefit of certain legal claims and litigation in the future; these gain contingencies are not recognized in the Condensed Consolidated Financial Statements.

Environmental Matters

Southeast Kansas Sites

By letter dated October 10, 2006, the Kansas Department of Health and Environment (KDHE) advised the Company that environmental contamination has been identified at a former smelter site in southeast Kansas. KDHE asserts that the Company is a corporate successor to an entity that is alleged to have owned and operated the smelter from 1915 to 1918. The Company has since been advised of possible connection between that same entity and two other former smelter sites in Kansas. KDHE has requested that the Company and another potentially responsible party (PRP) negotiate a consent order with KDHE to address contamination at these sites. The Company has participated in preliminary discussions with KDHE and the other PRP. The Company believes it is not liable for the contamination but as an alternative to litigation, the Company has entered into settlement negotiations with the other PRP. The negotiations are ongoing.

Shasta Area Mine Sites

Mining Remedial Recovery Company (MRRC), a wholly owned subsidiary of the Company, owns certain inactive mines in Shasta County, California. MRRC has continued a program, begun in the late 1980's, of sealing mine portals with concrete plugs in mine adits which were discharging water. The sealing program has achieved significant reductions in the metal load in discharges from these adits; however, additional reductions are required pursuant to a series of orders issued by the California Regional Water Quality Control Board (QCB). The remedial activities performed by MRRC have reduced impacts of acid rock drainage; however full compliance has not been achieved. The QCB is presently renewing MRRC's discharge permit and will concurrently issue a new order.

U.S.S. Lead

U.S.S. Lead Refinery, Inc., (Lead Refinery), a wholly owned subsidiary of MRRC, has been conducting remedial actions pursuant to a Consent Order with the U.S. Environmental Protection Agency (EPA) pursuant to Section 3008(h) of the Resource Conservation and Recovery Act. The Consent Order requires corrective action at Lead Refinery's East Chicago, Indiana site and provides for Lead Refinery to complete certain on-site interim remedial activities and studies that extend off-site. Site activities, which began in December 1996, have been substantially concluded. Lead Refinery's ongoing monitoring and maintenance activities at this site are handled pursuant to a post-closure permit issued by the Indiana Department of Environmental Management (IDEM) effective as of January 22, 2008. EPA has informed Lead Refinery that the Consent Order would be terminated upon issuance of the IDEM post-closure permit in effect. On April 9, 2009, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), the EPA added the Lead Refinery site to the National Priorities List (NPL). The NPL is a list of priority sites where EPA has determined that there has been a property placed on the NPL. The placement of a site on the NPL does not assign liability to any party or to the owner of a property placed on the NPL. The placement of a site on the NPL does not necessarily mean that remedial action must be taken. The Company is unable to determine the likelihood of a material adverse outcome or the amount or range of a potential loss with respect to placement of this site on the NPL. Lead Refinery lacks the financial resources needed to undertake any investigations or remedial action that may be required by EPA pursuant to CERCLA.

Eureka Mills Site

In November 2008, the Company received a general notice of liability and second request for information under CERCLA from the EPA concerning the Eureka Mills Superfund Site (the Eureka Mills Site) located in Juab County, Utah. The Eureka Mills Site is an area where mining and milling of various metals occurred over the course of several decades. The EPA has been investigating and remediating contamination associated with these activities. The Company's predecessor, Sharon Steel Corporation, acquired land within the Eureka Mills Site from UV Industries, Inc. in 1979. Pursuant to the court-approved 1990 bankruptcy plan of reorganization for Sharon Steel Corporation, the land was transferred by the Company to Amwest Exploration Company, a wholly owned subsidiary of the Company, which later sold the land to a third party in 1993. In 2001, the Company responded to an earlier request for information concerning milling activities stating that it was not responsible for any such activities at the Eureka Mills Site. The second request for information concerned historic mining activities. In responding to EPA's November 2008 letter and also to a recent third request for information received in March, 2009, the Company stated that it does not believe it is liable for the contamination. The Company has agreed to suspend temporarily the running of the time period during which the EPA must bring a lawsuit in order to allow time for the Company and the EPA to discuss this matter. The Company does not know the extent to which EPA may seek to hold the Company liable for cleanup or whether the Company would have claims against any other parties. The Company is continuing to evaluate this matter.

United States Department of Commerce Antidumping Review

On December 24, 2008, the United States Department of Commerce (DOC) initiated an antidumping administrative review of the antidumping duty order covering circular welded non-alloy steel pipe and tube from Mexico. The review will determine the final antidumping duties owed, if any, on U.S. imports by certain subsidiaries of the Company during the period November 1, 2007 through October 31, 2008, pursuant to the existing antidumping duty order. DOC has selected Mueller Comercial de Mexico, S. de R.L. de C.V. (Mueller Comercial) as a respondent in this proceeding. On May 29, 2009, Mueller Comercial notified DOC that it would no longer participate in the review. The Company anticipates that certain of its subsidiaries will incur additional antidumping duties on subject imports made during the review period. The Company does not anticipate any material adverse effect on its financial position as a result of this review, and believes it has adequately provided for such exposure.

Copper Tube Antitrust Litigation

The Company is named as a defendant in several pending litigations (the Copper Tube Actions) brought by direct and indirect purchasers of various forms of copper tube. The Copper Tube Actions allege anticompetitive activities with respect to the sale of copper plumbing tubes and/or copper tubes used in, among other things, the manufacturing of air-conditioning and refrigeration units. All of the Copper Tube Actions seek monetary and other relief. The Company believes that the claims for relief in the Copper Tube Actions are without merit. Due to the procedural stage of the Copper Tube Actions, the Company is unable to determine the likelihood of a material adverse outcome in the Copper Tube Actions or the amount or range of a potential loss in the Copper Tube Actions.

Employment Litigation

On June 1, 2007, the Company filed a lawsuit in the Circuit Court of Dupage County, Illinois against Peter D. Berkman and Jeffrey A. Berkman, former executives of the Company and B&K Industries, Inc. (B&K), a wholly owned subsidiary of the Company, relating to their alleged breach of fiduciary duties and contractual obligations to the Company through, among other things, their involvement with a supplier of B&K during their employment with B&K. The lawsuit alleges appropriation of corporate opportunities for personal benefit, failure to disclose competitive interests or other conflicts of interest, and unfair competition, as well as breach of employment agreements in connection with the foregoing. The lawsuit seeks compensatory and punitive damages, and other appropriate relief. In August 2007, the defendants filed an answer to the complaint admitting Peter Berkman had not sought authorization to have an ownership interest in a supplier, and a counterclaim against the Company, B&K and certain of the Company's officers and directors alleging defamation, tortious interference with prospective economic relations, and conspiracy, and seeking damages in unspecified amounts. In September 2007, Homewerks Worldwide LLC, an entity formed by Peter Berkman, filed a complaint as an intervenor based on substantially the same allegations included in the Berkmans' counterclaim. In October 2007, the Company also filed a motion seeking to have the Berkmans' counterclaim dismissed as a matter of law. On January 3, 2008, the Court overruled that motion and the case proceeded to discovery of the relevant facts. Since that time, depositions and document productions have been ongoing. However, on September 5, 2008, Peter Berkman withdrew prior responses to discovery requests and asserted the Fifth Amendment privilege against self-incrimination as to all requests directed to him. By that assertion, he took the position that his testimony about his actions would have the potential of exposing him to a criminal charge or criminal charges. On October 3, 2008, in response to a motion to compel filed by the Company, the Court held that Peter Berkman could not withhold documents on Fifth Amendment grounds, amongst other things. Peter Berkman moved for reconsideration of that order and his request was denied on November 19, 2008. On December 10, 2008, Peter Berkman moved for the opportunity to file an interlocutory appeal regarding the Court's ruling on the Company's motion to compel. On January 7, 2009, the motion for interlocutory appeal was granted, the Court found Peter Berkman in contempt for resisting discovery, and Peter Berkman has since filed a notice of appeal with the Illinois Appellate Court, Second Judicial District. All appellate briefs have been submitted and the Company is awaiting a date for oral argument. On October 24, 2008, the defendants filed a motion seeking leave to interpose an Amended Answer and Amended Counterclaims. On December 19, 2008, the Company filed an answer to the Amended Counterclaims that included a new affirmative defense based on the assertion of the Fifth Amendment by Peter Berkman. The Company believes that the counterclaims are without merit and intends to defend them vigorously. The Company does not anticipate any material adverse effect on its business or financial condition as a result of this litigation.

Other

In November 2008, the Company's European copper tube operation was damaged by fire. Production was curtailed for approximately four weeks to make necessary temporary repairs. Certain production equipment and portions of building structures were extensively damaged. The total value of the loss, including business interruption, cannot be determined at this time, but is expected to be covered by property and business interruption insurance. In 2008, as a result of the fire, the Company wrote-off certain fixed assets that were damaged which was offset by a receivable. There have been no significant additional write-offs in 2009. Additionally, the Company received an advance of approximately \$5.0 million from the insurance company in 2008 and an additional \$7.3 million in the second quarter of 2009, primarily to cover cleanup costs. The Company recorded these advances in other current liabilities net of cleanup costs incurred of approximately \$3.4 million, \$1.8 million of which was incurred in 2009. The Company has not recognized potential gains arising from property damage or business interruption insurance in the Condensed Consolidated Statements of Income during 2009, and will not do so until final settlement of the insurance claim.

Guarantees, in the form of letters of credit, are issued by the Company generally to guarantee the payment of insurance deductibles and certain retiree health benefits. The terms of the Company's guarantees are generally one year but are renewable annually as required. These letters are primarily backed by the Company's line of credit facility. The maximum potential amount of future payments the Company could have been required to make under its guarantees at June 27, 2009 was \$9.9 million.

Note 3 - Inventories

| (In thousands) | June | 27, 2009 | De | ecember 27, 2008 |
|----------------------------|------|----------|----|---------------------|
| Raw materials and supplies | \$ | 26,911 | \$ | 57,536 |
| Work-in-process | | 25,324 | | 39,018 |
| Finished goods | | 122,796 | | 122,756 |
| Valuation reserves | | (5,913) | | (8,701) |
| | | | | |
| Inventories | \$ | 169,118 | \$ | 210,609 |

The Company has deferred recognizing potential gains resulting from liquidation of LIFO inventories during the first half of 2009. The Company expects to replenish these inventories by the end of 2009 and, as such, has not recognized the effects of liquidating LIFO layers. In the event the Company is not able to replenish these inventories due to lack of availability or operational reasons, the Company would recognize a non-cash gain of approximately \$4.7 million, before income taxes, from the liquidation of LIFO layers based on quarter-end quantities.

Note 4 - Goodwill

The Company recognized an estimated goodwill impairment charge of \$18.0 million in the quarter ended December 27, 2008 related to its Mexican Operations, a part of the Plumbing & Refrigeration segment. An estimate was recorded because the Company did not complete step two of its annual impairment test as required by Statement of Financial Accounting Standards (SFAS) No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142) until the first quarter of 2009. The impairment resulted from revised projections of future cash flows as well as other estimates and assumptions due to prevailing market conditions.

In accordance with SFAS No. 142, the Company applies a fair value based impairment test to the net book value of goodwill and indefinite-lived intangible assets annually at the beginning of the fourth quarter and, on an interim basis if certain events or circumstances indicate that impairment may have been incurred. The analysis of potential impairment of goodwill requires a two-step process. The first step is the estimation of fair value. If this estimate indicates that impairment potentially exists, the second step is performed to quantify the amount of impairment, if any. Goodwill impairment exists when the implied fair value of goodwill is less than its carrying value.

The Company uses a discounted cash flow model (DCF model) to estimate the fair value of reporting units based on expected earnings, because there are no observable inputs available (Level 3 hierarchy as defined by SFAS No. 157, Fair Value Measurements). Cash flows are projected to equal (i) projected future earnings adjusted for the capital investment required to support operations and depreciation expense for a five-year period plus (ii) a terminal value. This cash flow stream is discounted to its present value to arrive at a fair value of each reporting unit. Future earnings are estimated using the Company's most recent annual projection, applying a growth rate to future periods. The discount rate used in the DCF model equals the Company's cost of capital plus a specific reporting unit risk premium.

The results of step one indicated goodwill was impaired at the Company's Mexican Operations as the estimated fair value was less than the carrying value of the reporting unit. As such, step two of the goodwill impairment test was performed to determine the actual amount of goodwill impairment. In this step, the Company was required to allocate the fair value of the reporting unit, as determined in step one, to all the reporting unit's assets and liabilities in a hypothetical purchase price allocation as if the Company's Mexican Operations had been acquired on that date. Upon completion of this step, the Company's original estimate did not change.

The determination of fair value of the reporting units requires the Company to make significant estimates and assumptions. Due to the inherent uncertainty involved in making these estimates, actual results could differ materially for those estimates.

Note 5 - Industry Segments

The Company's reportable segments are Plumbing & Refrigeration and Original Equipment Manufacturer (OEM). For disclosure purposes, as permitted under SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, certain operating segments are aggregated into reportable segments. The Plumbing & Refrigeration segment is composed of Standard Products (SPD), European Operations, and Mexican Operations. The OEM segment is composed of Industrial Products (IPD), Engineered Products (EPD), and Mueller-Xingrong. These segments are classified primarily by the markets for their products. Performance of segments is generally evaluated by their operating income. Intersegment transactions are generally conducted on an arms-length basis.

SPD manufactures copper tube and fittings, plastic fittings, plastic pipe, and line sets. These products are manufactured in the U.S. Outside the U.S., the Company's European Operations manufacture copper tube, which is sold in Europe and the Middle East. SPD also imports and resells brass and plastic plumbing valves, malleable iron fittings, faucets, and plumbing specialty products. Mexican Operations consist of pipe nipple manufacturing and import distribution businesses including product lines of malleable iron fittings and other plumbing specialties. The European Operations consist of copper tube manufacturing, as noted above, and the import distribution of fittings, valves, and plumbing specialties primarily in the U.K. and Ireland. The Plumbing & Refrigeration segment's products are sold primarily to plumbing, refrigeration, and airconditioning wholesalers, hardware wholesalers and co-ops, and building product retailers.

IPD manufactures brass rod, impact extrusions, and forgings as well as a variety of end products including plumbing brass; automotive components; valves and fittings; and specialty copper, copper-alloy, and aluminum tubing. EPD manufactures and fabricates valves and assemblies for the refrigeration, air-conditioning, gas appliance, and barbecue grill markets. Mueller-Xingrong manufactures engineered copper tube primarily for air-conditioning applications. These products are sold primarily to OEM customers.

Summarized segment information is as follows:

Note 6 – Comprehensive Income

Comprehensive income is as follows:

| | For the Quarter Ended | | | | | r the Six N | Ionths Ended | | |
|--|-----------------------|----------------|------------------|---------|------------------|-------------|--------------|------------------|--|
| | June 27, 2009 | | June 28, 2008 | | June 27, 2009 | | | June 28, 2008 | |
| (In thousands) | | | | | | · | | | |
| Consolidated net income | \$ | 6,167 | \$ | 28,024 | \$ | 3,657 | \$ | 55,931 | |
| Other comprehensive (loss) income, net of tax: | | | | | | | | | |
| Foreign currency translation | | 21,406 | | 3,163 | | 18,090 | | 5,867 | |
| Net change with respect to derivative instruments and hedging activities | | 2,798 | | (260) | | 5.821 | | 378 | |
| Other, net | _ | (99 <u>5</u>) | _ | 155 | _ | (631) | | 317 | |
| Total other comprehensive income | | 23,209 | | 3,058 | | 23,280 | | 6,562 | |
| Comprehensive income | | 29,376 | | 31,082 | | 26,937 | | 62,493 | |
| Less: comprehensive income attributable to noncontrolling interest | | (1,394) | | (1,724) | | (2,073) | | (3,130) | |
| Comprehensive income attributable to Mueller Industries, Inc. | \$ | 27,982 | \$_ | 29,358 | \$ | 24,864 | \$ | 59,363 | |

The change in cumulative foreign currency translation adjustment primarily relates to the Company's investment in foreign subsidiaries and fluctuations in exchange rates between their local currencies and the U.S. dollar. The value of the British pound sterling has increased approximately 15 percent and 13 percent during the second quarter of 2009 and first half of 2009, respectively, relative to the U.S. dollar. The value of the Mexican peso has increased approximately 7 percent and 4 percent during the second quarter of 2009 and first half of 2009, respectively, relative to the U.S. dollar.

Note 7 - Debt

During the second quarter of 2009, the Company repurchased and extinguished \$0.5 million in principal amount of its 6% Subordinated Debentures for \$0.4 million, resulting in a gain of \$0.1 million for the period.

At June 27, 2009, Mueller-Xingrong had available a secured revolving credit facility (the JV Facility) with an availability of RMB 425 million, or approximately \$62.2 million, that matured on July 3, 2009. Total borrowings outstanding at June 27, 2009 approximated \$9.6 million. Prior to maturity, but subsequent to quarter-end, Mueller-Xingrong repaid in full all amounts outstanding under the JV Facility. After repayment, Mueller-Xingrong's remaining cash on hand was adequate to meet its operational requirements and there was no impact on its continuing operations. On July 18, 2009, Mueller-Xingrong entered into a new credit agreement (the JV Credit Agreement) with a syndicate of four banks establishing a secured RMB 267 million, or approximately \$39.1 million, revolving credit facility with a maturity date of July 18, 2010. All other terms of the new JV Credit Agreement were substantially equivalent to the previous JV Facility.

Note 8 - Employee Benefits

The Company sponsors several qualified and nonqualified pension plans and other postretirement benefit plans for certain of its employees. The components of net periodic benefit cost (income) are as follows:

| | For the Quarter Ended | | | | | For the Six Months Ended | | | |
|------------------------------------|-----------------------|---------|------|------------|-----|--------------------------|------|------------|--|
| | June 27, 2009 | | June | e 28, 2008 | Jur | ne 27, 2009 | June | e 28, 2008 | |
| (In thousands) | | | | | | | | | |
| Pension benefits: | | | | | | | | | |
| Service cost | \$ | 197 | \$ | 508 | \$ | 561 | \$ | 1,247 | |
| Interest cost | | 2,098 | | 2,550 | | 4,660 | | 5,967 | |
| Expected return on plan assets | | (2,546) | | (3,833) | | (5,744) | | (8,755) | |
| Amortization of prior service cost | | 77 | | 77 | | 153 | | 179 | |
| Amortization of net loss | | 376 | _ | 75 | _ | 536 | _ | 129 | |
| Net periodic benefit cost (income) | \$ | 202 | \$ | (623) | \$_ | 166 | \$ | (1,233) | |
| Other benefits: | | | | | | | | | |
| Service cost | \$ | 63 | \$ | 83 | \$ | 117 | \$ | 163 | |
| Interest cost | | 265 | | 376 | | 603 | | 755 | |
| Amortization of prior service cost | | - | | - | | 1 | | 1 | |
| Amortization of net loss | | 43 | _ | 70 | _ | 84 | _ | 126 | |
| Net periodic benefit cost | \$ | 371 | \$ | 529 | \$_ | 805 | \$ | 1,045 | |

During the second quarter of 2009, the Company executed a Deed of Amendment (the Amendment) which froze the accrual of future benefits related to its U.K. pension plan. Pursuant to U.K. law, past service accruals will be adjusted for the effects of inflation after the execution of the Amendment. The Amendment had no material impact on the Company's results of operations.

The Company anticipates contributions to its pension plans for 2009 to be approximately \$1.2 million. During the first half of 2009, contributions of approximately \$0.7 million have been made to certain pension plans.

Note 9 – Income Taxes

The Company's effective tax rate for the second quarter of 2009 was 47 percent compared with 36 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the second quarter of 2009 were state income taxes of \$0.8 million, the effect of foreign statutory rates different from U.S. and other foreign adjustments of \$0.5 million and changes to valuation allowances of \$0.3 million. These items were partially offset by the U.S. production activities deduction of \$0.2 million.

The Company's effective tax rate for the first half of 2009 was 49 percent compared with 35 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the first half of 2009 were state income taxes of \$0.6 million, the effect of foreign statutory rates different from U.S. and other foreign adjustments of \$0.4 million, changes to tax contingencies of \$0.2 million, and valuation allowance changes of \$0.2 million. These items were partially offset by the U.S. production activities deduction of \$0.1 million. The expense from valuation allowance changes for the second quarter and first half of 2009 includes the addition of a valuation allowance of \$3.3 million, or 9 cents per diluted share, due to the expectation that a foreign deferred tax asset will not be realized, partially offset by the reduction of a valuation allowance of \$3.1 million, or 8 cents per diluted share, due to an increase in the expected future realization of a state deferred tax asset.

Changes in tax contingencies had an immaterial effect on the effective tax rate during the second quarter and first half of 2009. Total unrecognized tax benefits at the end of second quarter were \$8.2 million, without consideration of any applicable federal benefit, and this amount includes \$1.9 million of accrued interest. The Company includes interest and penalties related to income tax matters as a component of income tax expense. Of the \$8.2 million, approximately \$6.3 million would impact the effective tax rate, if recognized. An immaterial amount was recorded for interest accruals for the first half of 2009.

The Company files a consolidated U.S. federal income tax return and files numerous consolidated and separate income tax returns in many state, local, and foreign jurisdictions. The Company is no longer subject to U.S. federal income tax examinations for years before 2005 and with few exceptions is no longer subject to state, local, or foreign income tax examinations by tax authorities for years before 2002. The Internal Revenue Service has concluded its examination of the Company's 2005 and 2006 consolidated U.S. federal income tax returns, the results of which were immaterial to the Company. The Internal Revenue Service is beginning an examination of the Company's consolidated U.S. federal income tax return, as well as a federal return of an entity acquired by the Company. Additionally, various state taxing authorities are currently examining a number of the Company's state income tax returns for years from 2005 forward. The results of these examinations are not expected to have a material impact on the Company's financial position or results of operations.

Note 11 - Derivative Instruments and Hedging Activities

The Company adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133* (SFAS No. 161) during the first quarter of 2009. SFAS No. 161 requires enhanced disclosures for derivative instruments and hedging activities. The adoption of SFAS No. 161 did not have any impact on the Company's Condensed Consolidated Financial Statements.

Copper and brass represent the largest component of the Company's variable costs of production. The cost of these materials is subject to global market fluctuations caused by factors beyond the Company's control. The Company occasionally enters into forward fixed-price arrangements with certain customers; the risk of these arrangements is generally managed with commodity futures contracts. The Company accounts for these futures contracts in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133). These futures contracts have been designated as cash flow hedges. The fair value of open futures contracts are recognized as a component of accumulated other comprehensive income until the position is closed which corresponds to the period when the related hedged transaction is recognized in earnings. Should these contracts no longer meet hedge criteria in accordance with SFAS No. 133, either through lack of effectiveness or because the hedged transaction is no longer probable of occurring, all deferred gains and losses related to the hedge will be immediately reclassified from accumulated other comprehensive income into earnings. In the next twelve months, the Company will reclassify into earnings realized gains or losses of cash flow hedges; at June 27, 2009, the net fair value of these contracts was approximately a \$255 thousand gain.

At June 27, 2009 the Company held open futures contracts to purchase approximately \$11.2 million of copper over the next nine months related to fixed price sales orders. The fair value of those futures contracts was a \$219 thousand gain position, which was determined by obtaining quoted market prices (Level 1 hierarchy as defined by SFAS No. 157). The Company does not offset fair value of amounts for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral. At June 27, 2009, the Company had recorded restricted cash of \$1.3 million related to open futures contracts.

Derivative instruments designated as hedging instruments under SFAS No. 133 are reflected in the Condensed Consolidated Balance Sheets as follows:

| | | June 27, 2009 | | | | | |
|---------------------|----------------------------|----------------|------|-------|--|--|--|
| | | Location | Fair | value | | | |
| (In thousands) | | | | | | | |
| | | | _ | | | | |
| Commodity contracts | Other current assets: | Gain positions | \$ | 703 | | | |
| Commodity contracts | | Loss positions | | 370 | | | |
| Commodity contracts | Other current liabilities: | Gain positions | | 61 | | | |
| Commodity contracts | | Loss positions | | 139 | | | |

The following tables summarize activities related to the Company's derivative instruments, classified as cash flow hedges in accordance with SFAS No. 133:

| | Accumulated OCI | Recognized in (Effective Portion), of Tax |
|-------------------------|---|---|
| (In thousands) | For the Quarter Ended June 27, 2009 | For the Six Months Ended June 27, 2009 |
| Commodity contracts (1) | \$ 1,643 | \$ 2,374 |
| | | |

(1) Includes \$579 thousand and \$624 thousand attributable to noncontrolling interest for the quarter and six months ended June 27, 2009, respectively.

| | | (Gain) Loss Reclassified from | | | |
|---------------------|--------------------|---------------------------------|-------|---------|--------|
| | | Accumulated OCI into Income | | | ome |
| | | (Effective Portion), Net of Tax | | | Tax |
| | | For the Quarter For the | | e Six | |
| | | Ended Months I | | Ended | |
| | Location | June 27, 2009 June 2 | | June 27 | , 2009 |
| (In thousands) | | | | | |
| Commodity contracts | Cost of goods sold | \$ | 1,155 | \$ | 3,447 |

The Company enters into futures contracts that closely match the terms of the underlying transactions. As a result, the ineffective portion of the open hedge contracts at June 27, 2009 is not material to the Condensed Consolidated Statements of Income.

Note 12 - Fair Value of Financial Instruments

The carrying amounts for cash and cash equivalents, accounts receivable, and accounts payable approximate fair value due to the short-term maturity of these instruments. At June 27, 2009 and December 27, 2008, the fair value of the Company's debt was estimated at \$150.8 million and \$158.7 million, respectively, primarily using market yields and taking into consideration the underlying terms of the debt. Such fair value was less than the carrying value of debt at June 27, 2009 and December 27, 2008 by \$17.0 million and \$24.2 million, respectively.

Note 13 - Recently Issued Accounting Standards

In December 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements — an amendment of ARB No. 51 (SFAS No. 160). SFAS No. 160 requires (i) that noncontrolling (minority) interests be reported as a component of stockholders' equity, (ii) that net income attributable to the parent and the noncontrolling interest be separately identified in the Consolidated Statements of Income, (iii) that changes in a parent's ownership interest while the parent retains the controlling interest be accounted for as equity transactions, (iv) that any retained noncontrolling equity investment upon the deconsolidation of a subsidiary be initially measured at fair value, and (v) that sufficient disclosures are provided that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. The Company adopted the provisions of SFAS No. 160 in the first quarter of 2009. As a result of the adoption, the Condensed Consolidated Balance Sheets and the net income or loss attributable to noncontrolling interests has been separately identified in the Condensed Consolidated Statements of Income. The prior periods presented have also been reclassified to conform to the current classification required by SFAS No. 160.

In December 2008, the FASB issued FASB Staff Position (FSP) 132(R)-1, Employers Disclosures about Postretirement Benefit Plan Assets, which provides additional guidance on employers' disclosures about plan assets of a defined benefit pension or other postretirement plan. This interpretation is effective for financial statements issued for fiscal years ending after December 15, 2009. The adoption of this interpretation will increase the disclosures in the Notes to the Consolidated Financial Statements related to the assets of the Company's defined benefit pension plans.

In May 2009, the FASB issued SFAS No. 165, Subsequent Events (SFAS No. 165). SFAS No. 165 establishes standards for accounting for and disclosing subsequent events (events which occur after the balance sheet date but before financial statements are issued or are available to be issued). SFAS No. 165 requires an entity to disclose the date subsequent events were evaluated and whether that evaluation took place on the date financial statements were issued or were available to be issued. This standard is effective for interim and annual periods ending after June 15, 2009. The adoption of SFAS No. 165 did not have a material impact on the Company's financial condition or results of operations. For the quarterly period ended June 27, 2009, the Company has considered subsequent events through July 22, 2009, which is the date its Condensed Consolidated Financial Statements were filed with the Securities and Exchange Commission on Form 10-Q.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General Overview

The Company is a leading manufacturer of copper, brass, plastic, and aluminum products. The range of these products is broad: copper tube and fittings; brass and copper alloy rod, bar, and shapes; aluminum and brass forgings; aluminum and copper impact extrusions; plastic pipe, fittings and valves; refrigeration valves and fittings; fabricated tubular products; and steel nipples. The Company also resells imported brass and plastic plumbing valves, malleable iron fittings, faucets and plumbing specialty products. The Company's operations are located throughout the United States, and in Canada, Mexico, Great Britain, and China.

The Company's businesses are aggregated into two reportable segments: the Plumbing & Refrigeration segment and the OEM segment. For disclosure purposes, as permitted under SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, certain operating segments are aggregated into reportable segments. The Plumbing & Refrigeration segment is composed of the Standard Products Division (SPD), European Operations, and Mexican Operations. The OEM segment is composed of the Industrial Products Division (IPD), Engineered Products Division (EPD), and Mueller-Xingrong, the Company's Chinese joint venture. Certain administrative expenses and expenses related primarily to retiree benefits at inactive operations are combined into the Corporate and Eliminations classification. These reportable segments are described in more detail below.

SPD manufactures and sells copper tube, copper and plastic fittings, plastic pipe, line sets, and valves in North America and sources products for import distribution in North America. European Operations manufactures copper tube in Europe, which is sold in Europe and the Middle East; activities also include import distribution in the U.K. and Ireland. Mexican Operations include pipe nipple manufacturing and import distribution businesses including product lines of malleable iron fittings and other plumbing specialties. The Plumbing & Refrigeration segment sells products to wholesalers in the HVAC (heating, ventilation, and air-conditioning), plumbing, and refrigeration markets, to distributors to the manufactured housing and recreational vehicle industries, and to building material retailers.

The OEM segment manufactures and sells brass and copper alloy rod, bar, and shapes; aluminum and brass forgings; aluminum and copper impact extrusions; refrigeration valves and fittings; fabricated tubular products; and gas valves and assemblies. Mueller-Xingrong manufactures engineered copper tube for refrigeration applications; these products are sold primarily to OEM's located in China. The OEM segment sells its products primarily to original equipment manufacturers, many of which are in the HVAC, plumbing, and refrigeration markets.

New housing starts and commercial construction are important determinants of the Company's sales to the HVAC, refrigeration, and plumbing markets because the principal end use of a significant portion of the Company's products is in the construction of single and multi-family housing and commercial buildings. Repairs and remodeling projects are also important factors affecting the underlying demand for these products.

The majority of the Company's manufacturing facilities operated at significantly below capacity during 2008 and have continued to do so during the first half of 2009. This is due to the reduced demand for the Company's products arising from the continued decline in general economic conditions in the U.S. and in foreign markets that the Company serves. The U.S. housing and residential construction market has been adversely affected in the current economic downturn. According to the U.S. Census Bureau, new housing starts were 269 thousand in the first half of 2009, which is a 48 percent decrease from the same period in the prior year. The June 2009 seasonally adjusted annual rate of new housing starts was 582 thousand, representing a 46 percent decline from the June 2008 rate. While commercial construction has been more stable, it also has begun to decline. Per the U.S. Census Bureau, the May 2009 seasonally adjusted annual rate of Nonresidential Value of Construction Put in Place was \$716.7 billion of which \$409.0 billion was private; this is a decrease compared with \$719.9 billion and \$422.7 billion at May 2008. Business conditions in the U.S. automotive industry have also been exceptionally difficult in the recent economic downturn, which has affected the demand for various products in the Company's OEM segment. These conditions have significantly affected the demand for virtually all of the Company's core products.

Profitability of certain of the Company's product lines depends upon the "spreads" between the cost of raw material and the selling prices of its completed products. The open market prices for copper cathode and scrap, for example, influence the selling price of copper tubing, a principal product manufactured by the Company. The Company attempts to minimize the effects on profitability from fluctuations in material costs by passing through these costs to its customers. The Company's earnings and cash flow are dependent upon these spreads that fluctuate based upon market conditions.

Earnings and profitability are also impacted by unit volumes that are subject to market trends such as substitute products and imports, and market share. Plastic plumbing systems are the primary substitute product; these products represent an increasing share of consumption. U.S. consumption of copper tubing is still predominantly supplied by U.S. manufacturers, although imports from Mexico are a significant factor. Brass rod consumption in the U.S. has steadily declined over the past five years, due to the outsourcing of many manufactured products as well as the current economic conditions.

Results of Operations

Second Quarter 2009 compared with Second Quarter 2008

During the second quarter of 2009, the Company's net sales were \$367.8 million, which compares with net sales of \$753.5 million over the same period of 2008. The decrease is due to reduced unit sales volume across the majority of the Company's product lines as a result of reduced demand arising from current economic conditions. Additionally, selling prices have decreased due to the decreased average costs of raw materials during the period, which is generally passed on to customers. The Comex average price of copper, the Company's principal raw material, was \$2.15 per pound in the second quarter of 2009, compared with \$3.80 in the same period of 2008.

Cost of goods sold decreased from \$661.2 million in the second quarter of 2008 to \$313.4 million in the same period of 2009. The decrease is primarily due to decreased sales volume, lower average costs of raw materials, and reduced aggregate conversion costs as a result of reduced production workforce and lower utility costs. Depreciation and amortization decreased to \$10.4 million in the second quarter of 2009 from \$11.0 million in the second quarter of 2008 due to several assets becoming fully depreciated during 2008. Selling, general, and administrative expense was \$30.3 million for the second quarter of 2009 compared with \$34.6 million for the same period of 2008. The decrease is primarily due to decreased employment costs resulting from reduced headcount, reduced management incentive compensation, and reductions in sales and distribution expenses resulting from lower sales volume. Total headcount has declined from approximately 4,739 employees in June 2008 to approximately 3,566 employees in June 2009.

Interest expense for the second quarter of 2009 totaled \$2.5 million, compared with \$5.2 million for the same period of 2008. The decrease is primarily due to lower interest expense following the early extinguishment of a portion of the Company's 6% Subordinated Debentures in 2008 and in the second quarter of 2009. Other income, net was \$0.4 million for the second quarter of 2009 compared with \$2.0 million for the same period of 2008. The current year decrease was primarily due to decreased interest income resulting from lower interest rates.

The Company's effective tax rate for the second quarter of 2009 was 47 percent compared with 36 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the second quarter of 2009 were state income taxes of \$0.8 million, the effect of foreign statutory rates different from U.S. and other foreign adjustments of \$0.5 million and changes to valuation allowances of \$0.3 million. These items were partially offset by the U.S. production activities deduction of \$0.2 million. The expense from valuation allowance changes for the second quarter of 2009 includes the addition of a valuation allowance of \$3.3 million, or 9 cents per diluted share, due to the expectation that a foreign deferred tax asset will not be realized, partially offset by the reduction of a valuation allowance of \$3.0 million, or 8 cents per diluted share, due to an increase in the expected future realization of a state deferred tax asset.

Plumbing & Refrigeration Segment

Net sales by the Plumbing and Refrigeration segment were \$229.8 million in the second quarter of 2009 which is approximately a 43 percent decrease from \$404.4 million for the same period in 2008. The decrease is due to decreased sales volume in the majority of the segment's product lines as a result of weak demand and decreased selling prices resulting from lower average raw material costs. Of the \$174.6 million decrease in net sales, approximately \$52.1 million is attributable to lower unit volume and \$99.2 million is due to lower selling prices in the segment's core product lines consisting primarily of copper tube, line sets, and fittings. Additionally, the European copper tube operation has suffered lower sales volume following a fire in November 2008. Cost of goods sold decreased from \$340.1 million in the second quarter of 2008 to \$192.1 million in the second quarter of 2009. This decrease resulted from lower sales volume, decreased raw material costs, and reduced aggregate conversion costs from reductions in production workforce and lower utility costs. This decrease partially offset by a provision of \$2.2 million, or 4 cents per diluted share after tax, as a result of additional loss contingencies that management deemed to become probable and estimable during the period. Depreciation and amortization decreased to \$6.6 million in the second quarter of 2009 from \$7.3 million in the same period of 2008 due to several production assets becoming fully depreciated during 2008. Selling, general, and administrative expense decreased to \$19.2 million in the second quarter of 2009 from \$21.6 million in the second quarter of 2008 to \$19.2 million in the second quarter of 2009 due primarily to lower sales volume. Operating income for the segment decreased from \$35.4 million in the second quarter of 2008 to \$11.9 million in the second quarter of 2009 due primarily to lower sales volume and decreased unit spreads in many of SPD's product lines.

OEM Segment

Net sales for the OEM segment declined approximately 60 percent to \$139.9 million in the second quarter of 2009 from \$354.0 million in the second quarter of 2008. The decrease is due primarily to lower sales volume and lower selling prices resulting from lower average costs of raw materials. Of the \$214.1 million decrease in net sales, approximately \$154.2 million is attributable to lower unit volume and \$47.1 million is due to lower selling prices in the segment's core product lines consisting primarily of brass rod, forgings, and commercial tube. Cost of goods sold decreased from \$325.7 million in the second quarter 2008 to \$122.8 million in the second quarter of 2009. The decrease is due primarily to lower sales volume, lower raw material costs, and lower aggregate conversion costs resulting from reductions in production employees and lower energy costs. Depreciation and amortization remained consistent. Selling, general, and administrative expense decreased \$0.4 million to \$5.5 million in the second quarter of 2009 due primarily to decreased employment costs associated with headcount reductions. Operating income for the segment decreased from \$19.0 million in the second quarter of 2008 to \$8.1 million in the second quarter of 2009 due primarily to lower sales volumes, partially offset by improved unit spreads, especially in the segment's brass rod operations.

Six Months Ended June 27, 2009 compared with Six Months Ended June 28, 2008

During the first half of 2009, the Company's net sales were \$694.3 million, which compares with net sales of \$1.46 billion over the same period of 2008. The decrease is due to reduced unit sales volume across the majority of the Company's product lines as a result of reduced demand arising from current economic conditions. Additionally, selling prices have decreased due to the decreased average costs of raw materials during the period, which is generally passed on to customers. The Comex average price of copper, the Company's principal raw material, was \$1.86 per pound in the first half of 2009, compared with \$3.67 in the same period of 2008.

Cost of goods sold decreased from \$1.27 billion in the first half of 2008 to \$600.7 million in the same period of 2009. The decrease is primarily due to decreased sales volume, lower average costs of raw materials, and reduced aggregate conversion costs as a result of reduced production workforce and lower utility costs. Depreciation and amortization decreased to \$20.8 million for the six months ended June 27, 2009 from \$22.0 million for the same period of 2008 due to several assets becoming fully depreciated during 2008. Selling, general, and administrative expense was \$61.5 million for first half of 2009 compared with \$72.9 million for the same period of 2008. The decrease is primarily due to decreased employment costs resulting from reduced headcount, reduced management incentive compensation, reductions in sales and distribution expenses resulting from lower sales volume, and lower bad debt expense. Total headcount has declined from approximately 4,739 employees in June 2008 to approximately 3,566 employees in June 2009.

Interest expense for the six months ended June 27, 2009 totaled \$5.1 million, compared with \$10.7 million for the same period of 2008. The decrease is attributable to lower interest expense following the early extinguishment of a portion of the Company's 6% Subordinated Debentures in 2008 and the second quarter of 2009. Other income, net was \$1.0 million for the first half of 2009 compared with \$6.5 million for the same period of 2008. The current year decrease was primarily due to decreased interest income resulting from lower interest rates.

The Company's effective tax rate for the first half of 2009 was 49 percent compared with 35 percent for the same period last year. Factors that explain the difference between the effective tax rate and what would be computed using the U.S. federal statutory tax rate for the first half of 2009 were state income taxes of \$0.6 million, the effect of foreign statutory rates different from U.S. and other foreign adjustments of \$0.4 million, changes to tax contingencies of \$0.2 million, and valuation allowance changes of \$0.2 million. These items were partially offset by the U.S. production activities deduction of \$0.1 million. The expense from valuation allowance changes for the first half of 2009 includes the addition of a valuation allowance of \$3.3 million, or 9 cents per diluted share, due to the expectation that a foreign deferred tax asset will not be realized, partially offset by the reduction of a valuation allowance of \$3.1 million, or 8 cents per diluted share, due to an increase in the expected future realization of a state deferred tax asset.

Plumbing & Refrigeration Segment

Net sales by the Plumbing and Refrigeration segment were \$420.2 million in the first half of 2009 which is approximately a 47 percent decrease from \$788.3 million for the same period in 2008. The decrease is due to decreased sales volume in the majority of the segment's product lines as a result of weak demand and decreased selling prices resulting from lower average raw material costs. Of the \$368.1 million decrease in net sales, approximately \$159.7 million is attributable to lower unit volume and \$170.0 million is due to lower selling prices in the segment's core product lines consisting primarily of copper tube, line sets, and fittings. Additionally, the European copper tube operation has suffered lower sales volume following a fire in November 2008. Cost of goods sold decreased from \$668.1 million in the first half of 2008 to \$345.4 million in the first half of 2009. This decrease was partially offset by a provision of \$2.2 million, or 4 cents per diluted share after tax, as a result of additional loss contingencies that management deemed to become probable and estimable during the period. Depreciation and amortization decreased to \$13.2 million in the six months ended June 27, 2009 from \$14.5 million in the same period of 2008 due to several production assets becoming fully depreciated during 2008. Selling, general, and administrative expense decreased to \$39.4 million in the first half of 2009 from \$45.2 million in the same period of 2008. These decreases are primarily due to decreased employment costs from headcount reductions and lower aggregate sales and distribution expense resulting from lower unit sales volume. Operating income for the segment decreased from \$60.5 million in the first half of 2009 due primarily to lower sales volume and decreased unit spreads in copper tube, partially offset by improved unit spreads in other core products.

OEM Segment

Net sales for the OEM segment declined approximately 59 percent to \$278.3 million in the first half of 2009 from \$680.2 million in same period of 2008. The decrease is due primarily to lower sales volume and lower selling prices resulting from lower average costs of raw materials. Of the \$401.9 million decrease in net sales, approximately \$286.7 million is attributable to lower unit volume and \$92.0 million is due to lower selling prices in the segment's core product lines consisting primarily of brass rod, forgings, and commercial tube. Cost of goods sold decreased from \$615.2 million in the first half 2008 to \$258.9 million in the same period of 2009. The decrease is due primarily to lower sales volume, lower raw material costs, and lower aggregate conversion costs resulting from reductions in production employees and lower energy costs. Depreciation and amortization remained consistent. Selling, general, and administrative expense decreased from \$13.6 million for the six months ended June 28, 2008 to \$10.5 million in same period of 2009 due primarily to reduced bad debt expense and decreased employment costs associated with headcount reductions. Operating income for the segment decreased from \$44.5 million in the first half of 2008 to \$1.8 million in the first half of 2009 due primarily to lower sales volumes and decreased unit spreads, primarily in brass rod and Mueller-Xingrong.

Liquidity and Capital Resources

Cash provided by operating activities during the first half of 2009 totaled \$66.5 million, which is primarily attributable to decreased receivables and inventories, partially offset by decreased current liabilities. Fluctuations in the cost of copper and other raw materials affect the Company's liquidity. Changes in material costs directly impact components of working capital, primarily inventories and accounts receivable. During the six months ended June 27, 2009, the average Comex copper price was approximately \$1.86 per pound, which represents a 49 percent decrease over the average price for the same period in 2008. This decrease in the price of cathode has also resulted in sharp decreases in the open market price for copper scrap and, to a lesser extent, the price of brass scrap.

During the first half of 2009, cash provided by investing activities totaled \$4.9 million, which consisted of net reductions to restricted cash deposits of \$13.0 million and proceeds from sales of properties of \$0.6 million, partially offset by capital expenditures of \$8.7 million. Cash used in financing activities during the first half of 2009 totaled \$23.8 million, which consisted of the net reduction in Mueller-Xingrong's working capital debt facility of \$14.6 million, dividends paid to the Company's stockholders of \$7.4 million, and dividends paid by Mueller-Xingrong to its noncontrolling stockholders of \$1.4 million.

The Company has a \$200 million unsecured line-of-credit (Credit Facility) which expires in December 2011. At June 27, 2009, the Company had no borrowings against the Credit Facility. The Credit Facility backed approximately \$9.9 million in letters of credit at the end of the second quarter of 2009. As of June 27, 2009, the Company's total debt was \$167.9 million or 18.9 percent of its total capitalization (excluding noncontrolling interest). During the second quarter of 2009, the Company purchased and extinguished \$0.5 million of its 6% Subordinated Debentures for \$0.4 million, resulting in a gain of \$0.1 million for the period.

At June 27, 2009, Mueller-Xingrong had available a secured revolving credit facility (the JV Facility) with an availability of RMB 425 million, or approximately \$62.2 million, that matured on July 3, 2009. Total borrowings outstanding at June 27, 2009 approximated \$9.6 million. Prior to maturity, but subsequent to quarter-end, Mueller-Xingrong repaid in full all amounts outstanding under the JV Facility. After repayment, Mueller-Xingrong's remaining cash on hand was adequate to meet its operational requirements and there was no impact on its continuing operations. On July 18, 2009, Mueller-Xingrong entered into a new credit agreement (the JV Credit Agreement) with a syndicate of four banks establishing a secured RMB 267 million, or approximately \$39.1 million, revolving credit facility with a maturity date of July 18, 2010. All other terms of the new JV Credit Agreement were substantially equivalent to the previous JV Facility.

Covenants contained in the Company's financing obligations require, among other things, the maintenance of minimum levels of tangible net worth and the satisfaction of certain minimum financial ratios. As of June 27, 2009, the Company was in compliance with all of its debt covenants.

The Company declared and paid a regular quarterly cash dividend of ten cents per common share in the first and second quarters of 2009. Payment of dividends in the future is dependent upon the Company's financial condition, cash flows, capital requirements, earnings, and other factors. On November 1, 2009, the Company will pay approximately \$4.4 million in interest on the Debentures that remain outstanding.

Management believes that cash provided by operations and currently available cash of \$334.0 million will be adequate to meet the Company's normal future capital expenditures and operational needs. The Company's current ratio was 4.6 to 1 at June 27, 2009.

The Company's Board of Directors has extended, until October 2009, its authorization to repurchase up to ten million shares of the Company's common stock through open market transactions or through privately negotiated transactions. The Company has no obligation to repurchase any shares and may cancel, suspend, or extend the time period for the repurchase of shares at any time. Any repurchases will be funded primarily through existing cash and cash from operations. The Company may hold any shares repurchased in treasury or use a portion of the repurchased shares for employee benefit plans, as well as for other corporate purposes. From its initial authorization in 1999 through June 27, 2009, the Company had repurchased approximately 2.4 million shares under this authorization. In addition, the Company may repurchase portions of its 6% Subordinated Debentures through open market transactions or through privately negotiated transactions.

There have been no significant changes in the Company's contractual cash obligations reported at December 27, 2008.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to market risk from changes in raw material and energy costs, interest rates, and foreign currency exchange rates. To reduce such risks, the Company may periodically use financial instruments. All hedging transactions are authorized and executed pursuant to policies and procedures. The Company does not buy or sell financial instruments for trading purposes.

Cost and Availability of Raw Materials and Energy

Copper and brass represent the largest component of the Company's variable costs of production. The cost of these materials is subject to global market fluctuations caused by factors beyond the Company's control. Significant increases in the cost of metal, to the extent not reflected in prices for the Company's finished products, or the lack of availability could materially and adversely affect the Company's business, results of operations and financial condition.

The Company occasionally enters into future fixed-price arrangements with certain customers. The Company may utilize futures contracts to hedge risks associated with future fixed-price arrangements. The Company may also utilize futures contracts to manage price risk associated with inventory. Depending on the nature of the hedge, changes in the fair value of the futures contracts will either be offset against the change in fair value of the inventory through earnings or recognized as a component of accumulated other comprehensive income and reflected in earnings upon the sale of inventory. Periodic value fluctuations of the contracts generally offset the value fluctuations of the underlying fixed-price transactions or inventory. At June 27, 2009, the Company held open futures contracts to purchase approximately \$11.2 million of copper through March 2010 related to fixed-price sales orders.

Futures contracts may also be used to manage price risk associated with natural gas purchases. The effective portion of gains and losses with respect to these positions are deferred in stockholders' equity as a component of accumulated other comprehensive income and reflected in earnings upon consumption of natural gas. Periodic value fluctuations of the contracts generally offset the value fluctuations of the underlying natural gas prices. At June 27, 2009, the Company held no open contracts to purchase natural gas.

Interest Rates

At June 27, 2009, the Company had variable-rate debt outstanding of \$19.7 million, which related to the debt issued by Mueller-Xingrong and two Industrial Revenue Bonds with the State of Mississippi. At these borrowing levels, a hypothetical 10 percent increase in interest rates would have had an insignificant unfavorable impact on the Company's pre-tax earnings and cash flows. The primary interest rate exposure on floating-rate debt is based on LIBOR and on the base lending rate published by the People's Bank of China.

Foreign Currency Exchange Rates

Foreign currency exposures arising from transactions include firm commitments and anticipated transactions denominated in a currency other than an entity's functional currency. The Company and its subsidiaries generally enter into transactions denominated in their respective functional currencies. Foreign currency exposures arising from transactions denominated in currencies other than the functional currency are not material; however, the Company may utilize certain futures contracts to hedge such transactional exposures. Gains and losses with respect to these positions are deferred in stockholders' equity as a component of accumulated other comprehensive income and reflected in earnings upon collection of receivables. At June 27, 2009, the Company held no open foreign currency futures contracts.

The Company's primary foreign currency exposure arises from foreign-denominated revenues and profits and their translation into U.S. dollars. The primary currencies to which the Company is exposed include the Canadian dollar, the British pound sterling, the euro, the Mexican peso, and the Chinese renminbi. The Company generally views as long-term its investments in foreign subsidiaries with a functional currency other than the U.S. dollar. As a result, the Company generally does not hedge these net investments.

Cautionary Statement Regarding Forward Looking Information

Statements in this Quarterly Report on Form 10-Q that are not strictly historical may be "forward-looking" statements, which involve risks and uncertainties. These include economic and currency conditions, continued availability of raw materials and energy, market demand, pricing, competitive and technological factors, and the availability of financing, among others, as set forth in the Company's filings with the Securities and Exchange Commission (SEC). The words "outlook," "estimate," "project," "intend," "expect," "believe," "target," and similar expressions are intended to identify forward-looking statements. The reader should not place undue reliance on forward-looking statements, which speak only as of the date of this report. The Company has no obligation to publicly update or revise any forward-looking statements to reflect events after the date of this report.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures designed to ensure information required to be disclosed in Company reports filed under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures pursuant to Rule 13a-15(b) of the Exchange Act as of the end of the period covered by this report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of June 27, 2009 to ensure that information required to be disclosed in Company reports filed under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and (ii) accumulated and communicated to management, including the Company's principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the Company's fiscal quarter ending June 27, 2009, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. However, during the second quarter of 2009, the Company completed the implementation of the transaction processing system currently used by its U.S. operations for its Mexican operations.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

General

The Company is involved in certain litigation as a result of claims that arose in the ordinary course of business. Additionally, the Company may realize the benefit of certain legal claims and litigation in the future; these gain contingencies are not recognized in the Condensed Consolidated Financial Statements.

Copper Tube Antitrust Litigation

The Company has been named as a defendant in several pending litigations (the Copper Tube Actions) brought by direct and indirect purchasers of various forms of copper tube. The Copper Tube Actions allege anticompetitive activities with respect to the sale of copper plumbing tubes (copper plumbing tubes) and/or copper tubes used in, among other things, the manufacturing of air-conditioning and refrigeration units (ACR copper tubes). All of the Copper Tube Actions seek monetary and other relief.

Carrier ACR Tube Action

A Copper Tube Action (the Carrier ACR Tube Action) was filed in March 2006 in the United States District Court for the Western District of Tennessee by Carrier Corporation, Carrier S.A., and Carrier Italia S.p.A. (collectively, Carrier). The Carrier ACR Tube Action alleges anticompetitive activities with respect to the sale to Carrier of ACR copper tubes. The Company and Mueller Europe Limited (Mueller Europe) are named in the Carrier ACR Tube Action.

In July 2007, the Carrier ACR Tube Action was dismissed in its entirety for lack of subject matter jurisdiction as to all defendants. In August 2007, plaintiffs filed with the United States Court of Appeals for the Sixth Circuit a notice of appeal from the judgment and order dismissing the complaint in the Carrier ACR Tube Action. The Company and Mueller Europe filed notices of cross-appeal in August 2007.

In October 2007, Carrier filed with the United States Court of Appeals for the Sixth Circuit a motion to dismiss the cross-appeals, which the Court denied in December 2007. All appeals in the Carrier ACR Tube Action remain pending. Briefing on the appeals concluded in May 2009. A date for oral argument on the appeals has not been set.

Indirect-Purchaser ACR Tube Action

Two Copper Tube Actions were filed in June and August 2006 in the United States District Court for the Western District of Tennessee and were consolidated to become the Indirect-Purchaser ACR Tube Action. The Indirect-Purchaser ACR Tube Action is a purported class action brought on behalf of indirect purchasers of ACR copper tubes in the United States and alleges anticompetitive activities with respect to the sale of ACR copper tubes. The Company and Mueller Europe are named in the Indirect-Purchaser ACR Tube Action. The Company and Mueller Europe have been served, but have not yet been required to respond, in the Indirect-Purchaser ACR Tube Action.

Indirect-Purchaser Copper Tube Action

A Copper Tube Action (the Indirect-Purchaser Copper Tube Action) was filed in July 2006 in the United States District Court for the Northern District of California. The Indirect-Purchaser Copper Tube Action is a purported class action brought on behalf of indirect purchasers of copper plumbing tubes and ACR copper tubes in the United States and alleges anticompetitive activities with respect to the sale of both copper plumbing tubes and ACR copper tubes.

The Company, Mueller Europe, WTC Holding Company, Inc. (WTC Holding Company), Deno Holding Company, Inc. (Deno Holding Company), and Deno Acquisition Eurl are named in the Indirect-Purchaser Copper Tube Action. The Company, Mueller Europe, WTC Holding Company, and Deno Holding Company have been served, but have not yet been required to respond, in the Indirect-Purchaser Copper Tube Action. Deno Acquisition Eurl has not been served with the complaint in the Indirect-Purchaser Copper Tube Action.

Indirect-Purchaser Plumbing Tube Action

Four Copper Tube Actions were filed in October 2004 in state court in California and were consolidated to become the Indirect-Purchaser Plumbing Tube Action. The Indirect-Purchaser Plumbing Tube Action is a purported class action brought on behalf of indirect purchasers of copper plumbing tubes in California and alleges anticompetitive activities with respect to the sale of copper plumbing tubes. The Company, Mueller Europe, WTC Holding Company, Deno Holding Company, and Deno Acquisition Eurl are named in the Indirect-Purchaser Plumbing Tube Action. Deno Acquisition Eurl has not been served with the complaint in the Indirect-Purchaser Plumbing Tube Action.

The claims against WTC Holding Company and Deno Holding Company have been dismissed without prejudice in the Indirect-Purchaser Plumbing Tube Action. Mueller Europe has not yet been required to respond in the Indirect-Purchaser Plumbing Tube Action. The Company's demurrer to the complaint has been filed in the Indirect-Purchaser Plumbing Tube Action has stayed that action conditioned upon the parties' submitting periodic status reports on the status of the other Copper Tube Actions.

Although the Company believes that the claims for relief in the Copper Tube Actions are without merit, due to the procedural stage of the Copper Tube Actions, the Company is unable to determine the likelihood of a material adverse outcome in the Copper Tube Actions or the amount or range of a potential loss in the Copper Tube Actions.

Canadian Dumping and Countervail Investigation

In June 2006, the Canada Border Services Agency (CBSA) initiated an investigation into the alleged dumping of certain copper pipe fittings from the United States and from South Korea, and the dumping and subsidizing of these same goods from China. The Company and certain affiliated companies were identified by the CBSA as exporters and importers of these goods.

On January 18, 2007, the CBSA issued a final determination in its investigation. The Company was found to have dumped subject goods during the CBSA's investigation period. On February 19, 2007, the Canadian International Trade Tribunal (CITT) concluded that the dumping of the subject goods from the United States had caused injury to the Canadian industry.

As a result of these findings, exports of subject goods to Canada by the Company made on or after October 20, 2006 have been subject to antidumping measures. Under Canada's system of prospective antidumping enforcement, the CBSA has issued normal values to the Company. Antidumping duties will be imposed on the Company's Canadian customers only to the extent that the Company's future exports of copper pipe fittings are made at net export prices which are below these normal values. If net export prices for subject goods exceed normal values, no antidumping duties will be payable. These measures will remain in place for five years, at which time an expiry review will be conducted by Canadian authorities to determine whether these measures should be maintained for another five years or allowed to expire.

On August 27, 2008 the CBSA completed a review process pursuant to which revised normal values were issued to exporters of subject goods, including the Company. Given that these normal values are calculated on the basis of sales and cost data provided by the Company and given that the cost of copper has declined significantly since the issuance of the normal values in August 2008, the Company has experienced a decrease in its sales volumes of copper pipe fittings subject to the dumping order since the fourth quarter of 2008. However, given the small percentage of its products that are sold for export to Canada, the Company does not anticipate any material adverse effect on its financial condition as a result of the antidumping case in Canada.

Mueller's normal values are subject to potential review and revision in the future. Depending on the level of these revised normal values, the Company's ability to compete in Canada could be affected although, as discussed above, export sales to Canada comprise only a small percentage of the Company's total sales. The "sunset review" process, pursuant to which Canadian authorities will examine whether the dumping order should be revoked or maintained for another five years, will initiate in April 2011.

United States Department of Commerce Antidumping Review

On December 24, 2008, the United States Department of Commerce (DOC) initiated an antidumping administrative review of the antidumping duty order covering circular welded non-alloy steel pipe and tube from Mexico. The review will determine the final antidumping duties owed, if any, on U.S. imports by certain subsidiaries of the Company during the period November 1, 2007 through October 31, 2008, pursuant to the existing antidumping duty order. DOC has selected Mueller Comercial de Mexico, S. de R.L. de C.V. (Mueller Comercial) as a respondent in this proceeding. On May 29, 2009, Mueller Comercial notified DOC that it would no longer participate in the review. The Company anticipates that certain of its subsidiaries will incur additional antidumping duties on subject imports made during the review period. The Company does not anticipate any material adverse effect on its financial position as a result of this review, and believes it has adequately provided for such exposure.

Employment Litigation

On June 1, 2007, the Company filed a lawsuit in the Circuit Court of Dupage County, Illinois against Peter D. Berkman and Jeffrey A. Berkman, former executives of the Company and B&K Industries, Inc. (B&K), a wholly owned subsidiary of the Company, relating to their alleged breach of fiduciary duties and contractual obligations to the Company through, among other things, their involvement with a supplier of B&K during their employment with B&K. The lawsuit alleges appropriation of corporate opportunities for personal benefit, failure to disclose competitive interests or other conflicts of interest, and unfair competition, as well as breach of employment agreements in connection with the foregoing. The lawsuit seeks compensatory and punitive damages, and other appropriate relief. In August 2007, the defendants filed an answer to the complaint admitting Peter Berkman had not sought authorization to have an ownership interest in a supplier, and a counterclaim against the Company, B&K and certain of the Company's officers and directors alleging defamation, tortious interference with prospective economic relations, and conspiracy, and seeking damages in unspecified amounts. In September 2007, Homewerks Worldwide LLC, an entity formed by Peter Berkman, filed a complaint as an intervenor based on substantially the same allegations included in the Berkmans' counterclaim. In October 2007, the Company also filed a motion seeking to have the Berkmans' counterclaim dismissed as a matter of law. On January 3, 2008, the Court overruled that motion and the case proceeded to discovery of the relevant facts. Since that time, depositions and document productions have been ongoing. However, on September 5, 2008, Peter Berkman withdrew prior responses to discovery requests and asserted the Fifth Amendment privilege against self-incrimination as to all requests directed to him. By that assertion, he took the position that his testimony about his actions would have the potential of exposing him to a criminal charge or criminal charges. On October 3, 2008, in response to a motion to compel filed by the Company, the Court held that Peter Berkman could not withhold documents on Fifth Amendment grounds, amongst other things. Peter Berkman moved for reconsideration of that order and his request was denied on November 19, 2008. On December 10, 2008, Peter Berkman moved for the opportunity to file an interlocutory appeal regarding the Court's ruling on the Company's motion to compel. On January 7, 2009, the motion for interlocutory appeal was granted, the Court found Peter Berkman in contempt for resisting discovery, and Peter Berkman has since filed a notice of appeal with the Illinois Appellate Court, Second Judicial District. All appellate briefs have been submitted and the Company is awaiting a date for oral argument. On October 24, 2008, the defendants filed a motion seeking leave to interpose an Amended Answer and Amended Counterclaims. On December 19, 2008, the Company filed an answer to the Amended Counterclaims that included a new affirmative defense based on the assertion of the Fifth Amendment by Peter Berkman. The Company believes that the counterclaims are without merit and intends to defend them vigorously. The Company does not anticipate any material adverse effect on its business or financial condition as a result of this litigation.

Environmental Matters

Southeast Kansas Sites

By letter dated October 10, 2006, the Kansas Department of Health and Environment (KDHE) advised the Company that environmental contamination has been identified at a former smelter site in southeast Kansas. KDHE asserts that the Company is a corporate successor to an entity that is alleged to have owned and operated the smelter from 1915 to 1918. The Company has since been advised of possible connection between that same entity and two other former smelter sites in Kansas. KDHE has requested that the Company and another potentially responsible party (PRP) negotiate a consent order with KDHE to address contamination at these sites. The Company has participated in preliminary discussions with KDHE and the other PRP. The Company believes it is not liable for the contamination but as an alternative to litigation, the Company has entered into settlement negotiations with the other PRP. The negotiations are ongoing.

Shasta Area Mine Sites

Mining Remedial Recovery Company (MRRC), a wholly owned subsidiary of the Company, owns certain inactive mines in Shasta County, California. MRRC has continued a program, begun in the late 1980's, of sealing mine portals with concrete plugs in mine adits which were discharging water. The sealing program has achieved significant reductions in the metal load in discharges from these adits; however, additional reductions are required pursuant to a series of orders issued by the California Regional Water Quality Control Board (QCB). The remedial activities performed by MRRC have reduced impacts of acid rock drainage; however full compliance has not been achieved. The QCB is presently renewing MRRC's discharge permit and will concurrently issue a new order.

U.S.S. Lead

U.S.S. Lead Refinery, Inc., (Lead Refinery), a wholly owned subsidiary of MRRC, has been conducting remedial actions pursuant to a Consent Order with the U.S. Environmental Protection Agency (EPA) pursuant to Section 3008(h) of the Resource Conservation and Recovery Act. The Consent Order requires corrective action at Lead Refinery's East Chicago, Indiana site and provides for Lead Refinery to complete certain on-site interim remedial activities and studies that extend off-site. Site activities, which began in December 1996, have been substantially concluded. Lead Refinery's ongoing monitoring and maintenance activities at this site are handled pursuant to a post-closure permit issued by the Indiana Department of Environmental Management (IDEM) effective as of January 22, 2008. EPA has informed Lead Refinery that the Consent Order would be terminated upon issuance of the IDEM post-closure permit in effect. On April 9, 2009, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), the EPA added the Lead Refinery site to the National Priorities List (NPL). The NPL is a list of priority sites where EPA has determined that there has been a release or threatened release of contaminants that warrant investigation and, if appropriate, remedial action. The NPL does not assign liability to any party or to the owner of a property placed on the NPL. The placement of a site on the NPL does not necessarily mean that remedial action must be taken. The Company is mable to determine the likelihood of a material adverse outcome or the amount or range of a potential loss with respect to placement of this site on the NPL. Lead Refinery lacks the financial resources needed to undertake any investigations or remedial action that may be required by EPA pursuant to CERCLA.

Eureka Mills Site

In November 2008, the Company received a general notice of liability and second request for information under CERCLA from the EPA concerning the Eureka Mills Superfund Site (the Eureka Mills Site) located in Juab County, Utah. The Eureka Mills Site is an area where mining and milling of various metals occurred over the course of several decades. The EPA has been investigating and remediating contamination associated with these activities. The Company's predecessor, Sharon Steel Corporation, acquired land within the Eureka Mills Site from UV Industries, Inc. in 1979. Pursuant to the court-approved 1990 bankruptcy plan of reorganization for Sharon Steel Corporation, the land was transferred by the Company to Amwest Exploration Company, a wholly owned subsidiary of the Company, which later sold the land to a third party in 1993. In 2001, the Company responded to an earlier request for information concerning milling activities stating that it was not responsible for any such activities at the Eureka Mills Site. The second request for information concerned historic mining activities. In responding to EPA's November 2008 letter and also to a recent third request for information received in March, 2009, the Company stated that it does not believe it is liable for the contamination. The Company has agreed to suspend temporarily the running of the time period during which the EPA must bring a lawsuit in order to allow time for the Company and the EPA to discuss this matter. The Company does not know the extent to which EPA may seek to hold the Company liable for cleanup or whether the Company would have claims against any other parties. The Company is continuing to evaluate this matter.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The Company's Board of Directors has extended, until October 2009, its authorization to repurchase up to ten million shares of the Company's common stock through open market transactions or through privately negotiated transactions. The Company has no obligation to repurchase any shares and may cancel, suspend, or extend the time period for the repurchase of shares at any time. Any repurchases will be funded primarily through existing cash and cash from operations. The Company may hold any shares repurchased in treasury or use a portion of the repurchased shares for employee benefit plans, as well as for other corporate purposes. From its initial authorization in 1999 through June 27, 2009, the Company's stock repurchases for the period ended June 27, 2009

⁽¹⁾ Shares available to be purchased under the Company's 10 million share repurchase authorization until October 2009. The extension of the authorization was announced on October 21, 2008.

Item 4. Submission of Matters to a Vote of Security Holders

On May 7, 2009, the Company held its Annual Meeting of Stockholders at which four proposals were voted upon: (i) the election of directors, (ii) the appointment of independent auditors, (iii) a proposal to approve the Mueller Industries, Inc. 2009 Stock Incentive Plan, and (iv) a stockholder proposal regarding board membership. The following persons were duly elected to serve, subject to the Company's By-laws, as Directors of the Company until the next Annual Meeting, or until election and qualification of their successors:

| | Votes in Favor | Votes Withheld |
|------------------------|----------------|----------------|
| | | |
| Alexander P. Federbush | 33,248,483 | 2,024,935 |
| Paul J. Flaherty | 23,300,593 | 11,972,825 |
| Gennaro J. Fulvio | 34,648,672 | 624,747 |
| Gary S. Gladstein | 23,290,202 | 11,983,216 |
| Scott J. Goldman | 30,052,686 | 5,220,732 |
| Terry Hermanson | 22,999,458 | 12,273,960 |
| Harvey L. Karp | 34,469,353 | 804,065 |

The proposal to approve the appointment of Ernst & Young LLP as the Company's independent registered public accounting firm was ratified by 34,879,999 votes in favor, 375,383 votes against, and 18,035 votes abstaining. The proposal to approve the Mueller Industries, Inc. 2009 Stock Incentive Plan was ratified by 28,763,785 votes in favor, 4,306,048 votes against, and 26,690 votes abstaining. The stockholder proposal regarding board membership failed by 18,565,310 votes against, 11,687,608 votes in favor, and 2,843,605 votes abstaining. There were 2,176,895 broker non-votes related to the proposal to approve the 2009 Stock Incentive Plan and the stockholder proposal.

Item 6. Exhibits

- 4.1 Mueller Industries, Inc. 2009 Stock Incentive Plan (incorporated by reference from Appendix I to the Company's 2009 Definitive Proxy Statement with respect to the Company's 2009 Annual Meeting of Stockholders, as filed with the Securities and Exchange Commission on March 26, 2009).
- 19.1 Mueller Industries, Inc.'s Quarterly Report to Stockholders for the quarter ended June 27, 2009. Such report is being furnished for the information of the Securities and Exchange Commission only and is not to be deemed filed as part of this Quarterly Report on Form 10-Q.
- 31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act

Items 1A, 3, and 5 are not applicable and have been omitted.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

EXHIBIT INDEX

| Exhibits | <u>Description</u> |
|-----------------|---|
| 19.1 | Mueller Industries, Inc.'s Quarterly Report to Stockholders for the quarter ended June 27, 2009. Such report is being furnished for the information of the Securities and Exchange Commission only and is not to be deemed filed as part of this Quarterly Report on Form 10-Q. |
| 31.1 | Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002. |
| 31.2 | Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002. |
| 32.1 | Certification of Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |
| 32.2 | Certification of Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |

TO OUR STOCKHOLDERS, CUSTOMERS, AND EMPLOYEES

Mueller was profitable in the second quarter of 2009, after reporting a small loss in the first quarter of the year. Net income in the second quarter of 2009 was \$6.0 million, or 16 cents per diluted share. This compares with \$27.0 million, or 72 cents per diluted share, for the same period of 2008. Net sales for the second quarter of 2009 were \$367.8 million compared with \$753.5 million in 2008. For the first half, net income was \$3.5 million, or 9 cents per diluted share, on net sales of \$694.4 million. This compares with net income of \$54.4 million, or \$1.45 per diluted share, on net sales of \$1.46 billion for the first half of 2008.

Net sales of the Company's core product lines including copper tube, fittings, brass rod and forgings were substantially affected by the lower market values of copper and brass, the Company's principal raw materials, which are largely passed through to customers. In the second quarter of 2009, the Comex average price of copper was 43 percent lower than in the second quarter of 2008. Approximately \$206 million of the decrease in net sales was attributable to lower unit volume in our core product lines primarily in the OEM segment. Lower selling prices, primarily in the Plumbing & Refrigeration segment, accounted for approximately \$146 million of the decrease in net sales.

Our financial condition remains strong, and, in fact, improved in the second quarter. We ended the quarter with \$334.0 million in cash and \$581.2 million in working capital. Our current ratio remains solid at 4.6 to 1, and our financial leverage is conservative with a debt to total capitalization ratio of 18.9 percent.

We believe the construction industry is at, or near, a "bottom," although the pace and the extent of recovery remain uncertain. Mueller made rapid and extensive adjustments to its businesses as unit volumes declined, as a result of the national economic downturn. We expect Mueller to emerge from the current economic malaise a stronger, more efficient and more competitive company.

Very Truly Yours,

/S/ Harvey L. Karp Harvey L. Karp Chairman of the Board /S/ Gregory L. Christopher Gregory L. Christopher Chief Executive Officer

Statements in this release that are not strictly historical may be "forward-looking" statements, which involve risks and uncertainties. These include economic and currency conditions, continued availability of raw materials, market demand, pricing, and competitive and technological factors, among others, as set forth in the Company's SEC filings. These filings are available through our website at www.muellerindustries.com.

CERTIFICATION

I, Gregory L. Christopher, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Mueller Industries, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
